M. D. Crown In Session

The council of the above District met in the Municipal office, there being present Councillors Armstrong, Huepplheuser, Parker, Hand, Hall, and Stewart.

The minutes of the previous meeting were read, and it was moved by Parker that they be adopted as read.

Stewart: That cheques be signed by O. W. Huepplheuser, Reeve, and S. Cameron, for Sec.-Treas., during the absence of the Secretary, E. Walter Simpson; in accordance with Bank regulations.

Stewart: That this Council approves of the signatures on cheques issued previous to the date of this meeting and since the absence of Mr. Simpson; C. W. Huepplheuser, Reeve and S. Cameron for Sec.-Treas.

Huepplheuser: That this Council give no further relief to E. A. Bonn, until further notice is received from the Supervisor of Charity and Relief.

Parker: That the following applications for Consolidation be approved: N.E. 2 and S.E. 11-39-26-4; E. 1-2 and N.W. 3 & S.W. 10-38-26-4; W 1-2 2-38-26-4; N 1-2 9-37-26-4; N 1-2 9-39-26-4; N 1-2 24-4 S.1-2 of N.E. 27-39-28-4; N.W. 31-39-24-4; S.W. 3 -40-28-4; W 1-2 10, S.E. 16 & S.W. 21-40-26-4; N.E. 5-40-26-4; N.W. 30-40-27-4; N.W. 5-40-26-4; S.E. 5-40-26-4; N.E. 24-40-25-4; N.W. 9-40-25-4; N.E. 5-40-26-4; N.E. 28-40-26-4; N 1-2 26-41-26-4; S.E. 25-41-26-4; S.E. 25-41-26-4; S 1-2 34-41-26-4; W 1-2 12-41-26-4; N.W. 26-41-27-4.

Parker: That the house which is known as the McQuillan house be sold to Norman Whiteaw for Twenty Dollars.

Armstrong: That the following pay-sheets be passed: No. 14, $91.46; No. 12, $144.50; No. 13, $121.83; No. 14, $501.01;; No. 15, $150.40; No. 16, $446.20; No. 17, $135.93; No. 18, $129.61; No. 19, $109.35.

Hand: That the following accounts be passed and the Secretary instructed to pay same.

Division Four	2075.00
Division Five	1740.00
Division Six	2,760.00

Hall: That the meeting adjourn.

HARRY WRIGHT, SLAIN MAN HAD LANGDON FARM

Mrs. Eva Coo, who has been condemned to death for the murder of Harry Wright, former Calgarian, at Coopersville, N.Y., was a resident of Calgary for a number of years and is well-known in the North Hill district. Wright, who farmed at Langdon for several years, was also fairly well known.

Mrs. Coo, whose maiden name was Eva Currey, was born in Haliburton, Ont., but came to Calgary around 1914. She was married to William Coo, who is still a resident in the city, in 1916 and for many years they resided at 236 Seventh Ave. northeast.

The couple became involved in domestic difficulties around 1932 which ended in Coo securing a divorce. The woman later went into business, but around 1933 she was reported to have purchased a farm in the Langdon district in partnership with a man named Harry Wright.

The wage case Miss Hazel Curlette against Mr. and Mrs. C. Burden was dismissed without costs.

Rimbey and West District

Mr. J. D. Keith living four miles west of Rimbey threshed a 70 acre field last week with an average of 42 bushels. Most of the early wheat in this district has graded No. 2, but Mr. McNevin, U.G.G. agent at Forshee reports having graded several lots of No. 1. The samples weigh from 64 to 65.

Miss Melba Hogg, of Red Deer, was visiting friends in Rimbey last week.

Mr. Eber Cromnie, formerly of Red Deer has been engaged to teach the private school at Forshee. He and Mrs. Cromnie are in residence in the dwelling just north and east of the siding.

All of the rural schools are in full swing again, in charge of teachers as follows:

Benjamin	Mr. H. Dowling
Mount View	Mr. V. Whatera
Leedale	Mr. J. Hembury
Lockhart	Miss K. McNevin
Symonds	Mrs. C. C. Letroy
Potter Creek	Miss Lamberus
Fuller	Miss A. Hilman
Willesden Green	Miss M. McInnis
Mountgrennan	Miss E. Norman
Rose	Miss Lillian Aunger
Monte Vista	Mr. J. Manson
Woodale	Miss B. Aunger
Blindman	Miss Rawley
Chapel	Miss C. Massing
Centreview	Miss M. Massing
Hurlston	Miss Bolsevert
Lavesta	Mrs. Leslie Rimbey

The Girl's Club of the Center Valley W.I. under the convenorship of Mrs. L. A. Gunnel is holding its annual meeting on Saturday in the Chapel School house. Selection of officers and other important business will be transacted.

The short cut in the Rimbey highway near the B. E. Williams farm has been completed. The old barn was moved off the right-of-way and the municipal tractor was been at work there several days. Three bad corners have been eliminated by the change.

Teachers and friends of Inspector A. R. Gibson, in the Rimbey district, learned with regret that he has been transferred to the Cardston inspectorate.

Mr. Watson of Toronto was in this district last week buying horses for the Ontario market. He shipped a carload on Wednesday's train. It is understood that the stock brought good prices. One horse bringing $130. Mr. Max Soper of Airdrie is buying cattle in the Rimbey district this week.

A host of friends and well wishers gathered at the home Mr. and Mrs. Sam Rimbey on Friday evening to tender a shower to the newlyweds, Mr. and Mrs. Leslie Rimbey.

Mrs. J. Findlay who has been visiting with Mr. and Mrs. J. A. Beatty for the past two weeks left Sunday for her home in Toronto. She will visit in Winnipeg enroute.

Mrs. B. Hedemark of Blackfalds was visiting relatives here on Thursday of last week. Miss Clara Byers returned with her.

Mr. E. Johnstone has in his garden a 14 ft. row of Spencer Sweet peas that average 7 ft. in height. The plants are still in vigorous bloom and are attracting considerable attention.

Mr. Chas. Cooke who has farmed in the Rimbey district since 1911, returned on last Tuesday from a ten months sojourn in the south of Wales and reports a great holiday. An interesting account of his travels, and of conditions over there will appear in next week's Rimbey news.

HAROLD DEAN WATSON

Harold Dean Watson, third son of Mr. and Mrs. A. D. Watson, of the Wolfville School district, passed away in the Lacombe Hospital on Wednesday, Sept. 12th at 11 a.m.

He was born Jan. 18, 1907, in Lacombe, and lived in the above district nearly all his life time. He was of a quiet, happy disposition. The death of a young man of such sterling qualities as he possessed is a great loss to any community.

He will be sadly missed by many, and deeply mourned by his parents, sisters and brothers, Gladys, Hazel and Will of Banff; Daisy, Marion and George at home and Guy of Drayton Valley.

His brother Lee predeceased him, just two years ago in August.

The funeral took place in the United Church, Lacombe, on Friday, Sept. 7th at 2 p.m. Rev. R. B. Layton officiated.

Interment was made in the family plot in Lacombe Cemetery.

The pall-bearers were, Palmer Beach, William Frizzel, Ronald Tales, Lemuel Beach, Alfred Oglivie and Robert Paulsen.

There were many beautiful floral tributes.

BIRD GAME LICENSES

The season for Ducks, Geese, Hungarian Partridge, etc., opens at noon on Saturday, Sept. 15th. Get your Game License from Jack Halpin, at the Western Globe office.

FIRST GOVERNOR OF CENTRAL BANK

From a university graduate in 1919 to governor of the Central Bank of Canada in 1934 is very rapid progress for a young man, but it is the experience of Graham F. Towers of Montreal. This remarkable rise offers a text for moralization on a broad scale, but the most obvious single comment is that the world of trade and finance is not yet too crowded to keep the young man of ability, ambition and superb intellectual equipment from the quick advancement which is his due.

Mr. Towers' career to date should serve as a strong inspiration to the thousands of young university graduates and undergraduates who are now facing the future with uncertainty, if not despair. He has shown that there is still room at the top. Not yet thirty-seven, he has included in his activities to date three years' service in the Great War. In 1919 he graduated from McGill University and in the following year he entered the service of the Royal Bank of Canada as economist. In 1922 he became accountant at the Havana branch of that bank and since that time his advance has been very rapid. In 1928 he was appointed assistant inspector of Cuban branches and in the following year he returned to the head office as foreign inspector. In this capacity he visited the different branches of the bank in the West Indies, Central and Southern America, London, New York, Paris and Barcelona.

Since 1929 he has been in Canada. In that year being appointed chief inspector. In 1931 he became assistant to the general manager, and since November of last year he has been assistant general manager of the institution. He has a remarkable grasp of financial and economical subjects, and at the last annual convention of the Canadian Chamber of Commerce in Ottawa his address added greatly to his reputation as a speaker of note on financial questions.

YOUNG WOMEN'S AUXILIARY

The regular meeting of the Young Women's Auxiliary of St. Andrew's Church will be held on Tuesday evening, Sept. 18th, at 8 o'clock at the home of Mrs. John MacDonald. A hearty invitation is hereby extended to anyone desirous of joining this society.

NORTH FARMER FATALLY HURT

Wetaskiwin, Sept. 6—August Fredrick Kreutz, 74, was fatally injured at his home nine miles west of Wetaskiwin, Wednesday evening, while unhitching his team after delivering grain in town. The horses bolted and he was thrown under the wagon, receiving injuries from which he expired shortly after. He was a highly esteemed pioneer settler. The funeral took place on Sunday.

D. F. Belknap was called to the Bentley District to locate wells for M. B. Challand and others this week.

Golfers Hold Competition

Members of the Lacombe Golf Club won by a five and a half point margin over Stettler Club members in the first of a series of inter-club matches, played on the Lacombe course on Sunday, Sept. 9th. Single matches were played in the morning, Lacombe winning by six points, and two-ball foursomes during the afternoon, Stettler taking the latter by one-half point, leaving Lacombe five and one half points up on the round.

Play was as follows: Single matches: (Winners named first): G. T. Jackson, vs C. L. Willis, 1 pt. W. N. Morrison vs W. Dunlop, 1 pt. F. O. Vickerson vs J. Ellis, 1 pt. H. Teare vs J. Duckworth, 1 pt. H. Cunliffe vs L. Winter, 1¼ pt. H. Trame vs W. White, 1 pt. E. H. McCaugherty vs. P. Gillespie, 1¼ pt. C. Danford vs. R. Nellis, 1 pt. D. F. Chisholm vs F. Burrows, 1 pt. D. MacDonald vs W. Findlater, 1 pt. In the foursomes, D. Chisholm and G. T. Jackson beat J. Duckworth and P. Gillespie, 1 pt. D. MacDonald and W. N. Morrison beat E. Burrows and W. White, 1¼ pts. C. Danford and H. Cunliffe beat L. Winter and R. Nellis, 1 pt. W. Dunlap and W. Findlater beat Dr. Decker and F. O. Vickerson, 1 pt. C. L. Willis and J. Ellis took one points against ¼ pt. made by H. Teare and E. McCaughty. Circumstances permitting, it is expected a return game will be played in Stettler next Sunday.

LADIES' GOLF DRAW FRIDAY, SEPT. 14

BRENNA B. REED GIVING RECITAL IN RED DEER, FRIDAY, SEPTEMBER 21st

After six years' study in Toronto, Miss Brenna B. Reed of the Experimental Station has returned to the West. While in Toronto she took the A.T.C.M. degree in piano and voice and L.A.B. in piano. Recently she has opened a studio in Red Deer and on Friday, September 21st, will give a recital of songs and piano numbers in the United Church, Red Deer. Her mother, Mrs. F. H. Reed, will act as her accompanist. Many of the music lovers of Lacombe will enjoy this first concert of the season.

This recital will be given under the auspices of the "S.T.O. Club" of Red Deer. A collection will be taken at the door in aid of the funds of this popular service club.

NAME ALBERTA VOTE REVISERS

Ottawa, Sept.—The Alberta revising officers for the next general election lists were appointed here today as follows:

Airdrie, George H. Wade, Banna; Athabaska, Frederick L. Connon, St. Paul; Battle River, Elmore Stewart, Vermilion; Bow River, Willard R. Sandercock, Drumheller; Calgary, East, George W. Peacock, Calgary; Calgary, West, Wilfred W. Wilson, Calgary; Camrose, Elmere B. Fair, Stettler.

Edmonton, East, Alberta Kielpys; Edmonton, West, Thomas H. Wells; Jasper-Edson, Wm. Bristow, Spruce Grove; Lethbridge, J. Norman Ritchie, Lethbridge; Macleod, George H. Scougall, MacLeod; Medicine Hat, William McInnes, Bassano; Peace River, Ernest Bergin, Clairmont; Red Deer, Absalom C. Bury, Olds; Vegreville, Frank J. A. Fane, Mundare; Wetaskiwin, Edwin H. Jones, Lacombe.

BANK TELLER IN TOILS AFTER "HOLDUP" STORY

Toronto, Sept. 11—George Lindsay, 26-year-old bank teller, who claimed he had been slugged and robbed by a bandit, Tuesday, faced a charge of stealing $4,800 from a branch of the Dominion Bank of Canada here.

His arrest followed police investigation of reports a bandit had entered the bank, slugged Lindsay over the head, herded him down into the basement with two other employes, and escaped with the money from the teller's drawer. Officers said they found $4,630 in a safety deposit box at the bank and more in the leg of a leather chair in Lindsay's room.

BASK. GRAIN BUYER KILLED

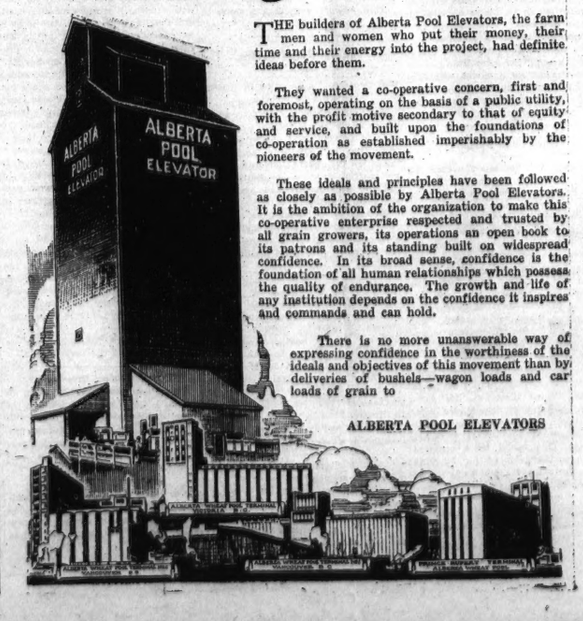

Craik, Sask., Sept.—Victim of an alleged shooting in this village Tuesday afternoon, George Glover, 66-year-old grain buyer, died in Davidson hospital Tuesday from the effects of a bullet wound through the head.

Slight improvement was reported in the condition of Donald McKenzie, 45 crippled war veteran who it is alleged, after shooting Glover and attempting to kill Mrs. McKenzie, turned a newly-bought rifle on himself. The bullet entered his head.

It is alleged that a friendship between the 21year-old Mrs. McKenzie and the elderly Glover preyed on the mind of the women's husband.

Mr. R. L. Robson had a surprise visit this week from an uncle, Mr. Jos. Robson, of Red Oak, Iowa, who in company with a friend, Mr. Tracy from the same state are making a tour of Alberta. Mr. Robson is in his 72nd year, and Mr. Tracy has reached the 76-year mark, but in spite of age these two gentlemen motored from Iowa to the Peace River country, and are now visiting other friends in the Province. They are greatly pleased with the conditions in Central Alberta, which are much better than conditions in their home state.

Following An Ideal

THE builders of Alberta Pool Elevators, the farmmen and women who put their money, their time and their energy into the project, had definite ideas before them.

They wanted a co-operative concern, first and foremost, operating on the basis of a public utility, with the profit motive secondary to that of equity and service, and built upon the foundations of co-operation as established imperishably by the pioneers of the movement.

These ideals and principles have been followed as closely as possible by Alberta Pool Elevators. It is the ambition of the organization to make this co-operative enterprise respected and trusted by all grain growers, its operations an open book to its patrons and its standing built on widespread confidence. In its broad sense, confidence is the foundation of all human relationships which possess the quality of endurance. The growth and life of any institution depends on the confidence it inspires and commands and can hold.

There is no more unanswerable way of expressing confidence in the worthiness of the ideals and objectives of this movement than by deliveries of bushels—wagon loads and car loads of grain to

ALBERTA POOL ELEVATORS

Lose Lives in Burning Ship

NEW YORK, Sept. 8—A heavy storm swept the Atlantic coast today as the burning liner Morro Castle lay helpless off the New Jersey shore. All along the coast warnings were flying while south of Virginia Cape hurricane warnings were ordered.

SPRING LAKE, N.J.—Dead and missing numbered 198 this afternoon, hours after the $3,000,00 Ward Line Morro Castle, liner burned in the open sea eight miles off the the Jersey coast and 39 miles from New York City.

As authorities began to correlate incoherent accounts of one of the worst peace-time marine disasters, they were told by members of the crew of Castle that more than 200 passengers died because they refused to enter life-boats.

Tales related by passengers and crew were those of horror and heroism—but, in the accounts of the crew, tragic overtones were of passengers fighting attempts to place them in boats.

Seamen, who once were curtly ordered to stop talking by surviving officers, said all of the passengers could have been saved if they had followed orders.

The first frantic "SOS" was picked up at 3:32 a.m. E.S.T., SO swiftly did the roaring flames envelope the vessel, with its 318 sleeping passengers en route home to New York after a seven-day excursion to Havana, that the ship soon was aflame from stem to stern.

Shortly after 10 a.m. E.S.T. fewer than 300 survivors had been landed or picked up by nearby steamers racing to the rescue.

Bodies were visible on the water off the coast at Sandy Hook, N.J. Surf boats from the coastguard stations along the Jersey shore pushed through the heavy seas in search of survivors.

A bolt of lightning struck an oil tank of the 11,520 ton liner, and fire broke out so quickly, survivors said, that there was little time even to spread the alarm to sleeping passengers.

DIDSBURY BANKER SUICIDES

Didsbury, Alta., Sept. 7—Larry A. Leavens, 36-year-old accountant of the Royal Bank of Canada here, committed suicide last night, according to police. The body was found on Thursday.

A fearful rent in the breast from the discharge of a double-barrelled shot-gun, Leavens' body was found beside his car in an old shed on the exhibition grounds about 1:20 in the afternoon by two boys.

Coroner Dr. J. L. Clarke examined the body and reported to the police it was a straight case of suicide and decided an inquest unnecessary.

Leavens, a married man with one child, had been employed with the Didsbury branch of the Royal Bank for nearly two years. He was born at Foxwarren, Man.

According to the story of Coroner Clarke, Leavens left his home about 6:30 last evening supposedly going to the bank, where some district officials from Calgary were conducting an examination of books. The accountant did not go to the bank.

His friends were worried when he did not return home last evening, but did not suspect any such dire eventuality. Thursday, however, a search was conducted for him. Two boys noticed his car and on drawing close found his body. Constable E. Nercher was summoned and he, together with Dr. Clarke, announced the young accountant had taken his own life.

One resident of the Town recalled having heard a shotgun report about 7 last evening and it is concluded this was the fatal firing.

AT THE AVALON
Thursday, Friday, Saturday
Eddie Cantor
in "ROMAN SCANDALS"
also
"THE THREE LITTLE PIGS"
Will as many people as possible try and see the show Thursday and Friday or come to the first show Saturday. Show starts week nights at 8:15, Saturday 7:30 and 9:20.

Sunday, Sept. 16—Sept. 16—Services in connection with the United Church will be held at Meadowbrook at 11 a.m.; Fairview at 3 p.m. and Elkhorn at 7:30 p.m. Rev. A. E. Hayes, occupying the pulpit.

Get your threshing meat at A. Gilmour's, No. 1 steer and heifer meat.

125000 Cattle to Slaughter

Ottawa, Sept.—Arrangements for the disposition of 125,000 head of cattle in the drouth areas of the prairies had not been concluded today, but progress was reported and it was believed the cabinet would concur in the scheme.

An extensive process of slaughter is planned. Hon. Robert Weir, minister of agriculture, promised a statement either Wednesday evening or in Toronto on Thursday after an interview with the packers.

The scheme is that what was agreed upon at a conference of the prairie government representatives in Regina last week. Investigation disclosed that it is uneconomic to ship fodder to the animals or even to transport them extensively to the northern areas.

Almost 30,000 of the cattle lacking food are now in a dying condition, but the bulk of the rest have enough to sustain them till New Year's.

Negotiations between the prairie representatives and the packers disclosed a readiness on the part of the latter to co-operate, their compensation for the slaughtering being largely the bone and offal.

The farmers would be given a reasonable price—a fixed allowance per pound—by the three prairie governments and the Dominion on a 50-50 basis. The meat would be shipped to countries where bone-less chilled beef is commonly in use, and inquiry disclosed a ready market.

Approximately 20,000 head in Manitoba, 75,000 in Saskatchewan and 30,000 in Alberta would be involved in the plan.

ST. ANDREW'S UNITED CHURCH

Rev. R. B. Layton, Minister
L. D. Wright, Musical Director
Services at 11 a.m. and 7:30 p.m.
Sunday School at 11 a.m.

LEST WE FORGET CLUB

The regular monthly meeting of the Lest We Forget Club will be held in the town hall on Wednesday evening, Sept. 19th at 8 o'clock.

BOTTLE CORK LOCK

Greenwich, Conn.—There's no "snitching" drinks from Frank E. Vanderhoof's bottle. He has invented a "bottle lock-cork" which makes it impossible to pull corks, (milk, whiskey or poison) unless you have the key. But then, it's been known to break off the necks.

ECKVILLE FARMER SHOT

Eckville, Sept.—Hans Martinson, farmer was killed Monday when a shotgun discharged while he was handling it in his garage. It is believed the shooting was accidental.

TOWN OF LACOMBE

Tenders For the Purchase of Debentures

Sealed tenders marked "Tender for the Purchase of Debentures" will be received by the undersigned up to noon on Tuesday, September 18, 1934, for the purchase of debentures of the Town of Lacombe in the sum of $2,000.00 bearing interest at six (6 pc.) per centum per annum payable in 10 equal aggregate yearly instalments as to both principal and interest. The debentures are issued in units of $500.00 each and offers may be made on one or all four units. Particulars may be obtained at the Town Office.

Dated this 8th day of September, 1934.

LEWIS P. MINKLER,
Secretary-Treasurer

WORLD HAPPENINGS BRIEFLY TOLD

Hon. Irene Parlby has been sworn in as minister without portfolio in the Reid government.

The Soviet Union has named M. Ostrovski as its minister to Roumania. Recognition of the Soviet by Roumania came a few weeks ago.

A gold rush has developed north of Grand Marias ,Minn., in Ontario, where a vein has been struck which has yielded $17.50 worth of the precious metal to the ton.

In accordance with a wish expressed in his will, only six words appear on the tomb of President von Hindenburg. They are: "Paul von Hindenburg. 1847 to 1934."

Old King Winter opened his 1934 assault on Aug. 14 at Hornepayne, Ont., when a high north wind brought with it intermittent snow flurries, at a temperature of 40 degrees above zero.

China exacted retribution for the murder of Dr. J. H. Ingram, 57-year-old American missionary, by bandits two months ago, when the provincial government executed five Chinese convicted of the crime.

The first studio in India for production of sound pictures has been opened at Calcutta. American equipment that can be moved about for production of news reels is being used.

Demand for denunciation of the Washington naval treaty before December 31, 1934, was voiced by high Japanese naval officials, including Minister of the Navy Admiral Osumi, according to reports received from Tokyo.

Premier Mitchell F. Hepburn, of Ontario, renewed his demands for monetary reform before a meeting in honor of Hon. Dr. Leonard J. Simpson, minister of education, and declared Australia had practically settled her economic problems, so Canada could do the same.

Cost Of Wheat Production

Found To Range Between 63 And 76 Cents Per Bushel

Experiments conducted by the Dominion Department of Agriculture place the cost of growing wheat in Manitoba, Saskatchewan, and Alberta at sums ranging from 63 cents to 76 cents per bushel. The experiments were conducted on land rented from farmers in representative districts and indicated that the average cost based on 31 experiments in the three prairie provinces was $14.53 per acre for wheat grown on summerfallow. The average yield was 23.2 bushels per acre and the average cost per bushel was 63 cents. Wheat grown as second crop after summerfallow in Alberta and Saskatchewan cost $12.39 per acre and yielded an average of 16.2 bushels, thus establishing a cost of 76 cents per bushel. Second crop wheat grown on eight illustration stations in Manitoba showed a cost of 65 cents per bushel. These figures do not include the cost of hauling the grain from the farm to the elevator. Average costs, of course, depend largely on average yields, which in turn depend upon the quality of the soil, seasonal and climatic conditions, and the methods of husbandry employed.

New Electrical Device

Smash-And-Grab Raider Has Met His Match

A new electric device has just been produced which may spell the doom of the smash-and-grab raider. When a thief smashes a jeweller's window, before he can snatch any of the tempting gems displayed in it they have disappeared from sight under a steel shutter. At the same time an alarm warns the whole neighborhood of the attempted robbery. Experts says that an apparatus which would hold the thief until the police arrived could be operated in conjunction with this device, if it were not for the fact that "mantraps" are illegal. Photo-electric rays have been used very ingeniously in this new anti-smash-and-grab device, which was demonstrated the other day and proved a triumphant success.

British Broadcasting Corporation

Largest Radio Transmitter To Be Placed In Operation

Great Britain's largest radio transmitter has been completed at Droitwich by the British Broadcasting Corporation, and as soon as final testing has been accomplished it will be placed in operation.

The new station, with power of 150 kilowatts, is more than twice as powerful as stations hitherto operating in England, and broadcasting is expected to commence very shortly.

At present the country's regional transmitters, which are the highest powered stations in England, operate on 50 to 60 kilowatts. These are to be increased to 70 kilowatts after the new station is put into operation.

Although Crater Lake National Park, in Oregon, is in a high altitude region, it has more than 377 varieties of flowers.

Since becoming an independent state in 1831, Belgium has had but four kings.

Not What They Seem

Many Things Have No Association With Their Name

Cork legs are not made of cork. They are made of wood, metal, leather, or strong canvas; they were invented by Dr. Cork. Hackney coaches are not so called because they were first made in Hackney, London. The word comes from the French "Haquenee," meaning an ambling horse. Briar pipes are not made from the roots of the sweet briar. The name is derived from the French "Bruyere," meaning heath. Dark blue and light blue are not the colors of the Universities of Oxford and Cambridge respectively. A university has no colors. But members are entitled to wear the university badge. Dark blue and light blue are the colors of the athletic clubs of Oxford and Cambridge. A laughing jackass is not an animal; it is a bird. Cinderella did not wear a glass slipper. She wore a fur slipper, but the original French words were "Pantoufle en vair," and the sound was mistaken for "Pantoufle en verre"; thus "fur" was changed to "glass".

LOVELY IN-BETWEEN-SEASON WEAR SO YOUTHFULLY SMART AND SO SIMPLE TO MAKE

One of the new novelty rayon crepes in light evergreen coloring was chosen for this very smart looking dress. You will note its interesting collar. It is white bengaline silk.

The V-neck and centre-front skirt seaming are exceptionally slimming qualities, rendering this a model for normal or heavier figures.

One of the new heavy crepe silks, black crepe satin or crepe marocain can be used equally well. Lightweight woolens are also suitable, particularly the new novelties with a glint or metal in its weave.

Style No. 552 is designed for sizes 16, 18 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3⅝ yards of 39-inch material with ½ yard of 35-inch contrasting, 2¼ yards of plaiting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Luminous Human Body

Story Comes From Greece Of Strange Freak Of Nature

Another luminous human body engrossing scientific attention occupied columns in the Athenian press, recently.

Anastasius Economos, a mailman at Saloniki, is the subject of this second recent discovery. In Italy recently a woman whose body was seen to give light while she slept was placed under observation in Rome. But she failed to respond.

Economos' body was said to give out sufficient rays to light a dark room.

Wheat Acreages

There is no record of the production of wheat in Canada in 1830, but in 1880, 2,366,554 acres on 464,025 farms produced 32,350,452 bushels, whereas in 1930, 24,898,000 acres on 728,664 farms produced 420,672,000 bushels. Thus in 50 years, the number of farms increased only about 57 per cent. while the number of acres increased about 1,000 per cent.

Christmas Seal Campaign

A.C.T. To Aid Saskatchewan Anti-Tuberculosis League In Worthy Effort

The Associated Canadian Travellers, with a membership of close to five hundred, and clubs in five of the leading cities of the province, have joined forces with the Christmas Seal Sale committee of the Saskatchewan Anti-Tuberculosis League and their entire membership for two months this fall will boost the sale of sheets of these cheerful little stickers, the revenue from which is accomplishing such gratifying results in the prevention of the spread of tuberculosis in Saskatchewan.

This alert organization, being desirous of associating itself with some humanitarian cause in which every member could actively participate, is determined to make this effort a real success. Its membership in five of the leading cities of the province have whole-heartedly signified their approval of the Christmas Seal Sale as a major activity, and on September 1st will initiate a campaign that is designed to enlist the support of the entire business community of the province.

While the generous manner in which wholesalers and retailers have supported the Christmas Seal Sale in the past is fully realized and appreciated, it is also felt that the response would be much greater if the purpose of the sale was fully understood and that a larger group of people would be reached by a canvass such as the Associated Canadian Travellers have volunteered to make. Personal contact means a great deal in any effort and this will be provided by the A.C.T. members, each of whom will be supplied with a pamphlet giving full information regarding the work of the Saskatchewan Anti-Tuberculosis League and the all-important preventive work that is made possible by the sale of Christmas Seals.

The information contained in this pamphlet is of vital interest to every resident of Saskatchewan. Here are some of the facts in a nutshell:

The tuberculosis death rate in Saskatchewan has been reduced 25 per cent. in the past four years.

The cost of treatment in Saskatchewan Sanatoria was over $200,000 less in 1934 than in 1930.

Since preventive work was commenced in 1928, a total of 29,673 persons have been examined at the expense of the Christmas Seal Preventive Fund.

Proceeds from the sale of Christmas Seals provides the funds for preventive work. This discloses cases in their early stages, making recovery more certain and reducing the period of treatment and the cost to the taxpayers.

The money raised by taxes for the maintenance of the three Saskatchewan Sanatoria is for treatment only; the money for preventive work is raised by the sale of Christmas Seals.

Prevention of tuberculosis and the protection of the well from infection is equally as important in the fight against tuberculosis as the care of those suffering from the disease.

During 1933 there were three hundred deaths from tuberculosis in Saskatchewan. During the past six years one-third of all deaths from infectious diseases in this province have been due to tuberculosis. It is now the most fatal of all infectious diseases.

The education of everyone regarding the control of tuberculosis.

The provision of clinics for the examination of all persons having symptoms of tuberculosis, who are suspected by their family doctors of tuberculosis. Among 7,239 persons suspected and referred by physicians to clinics, sanatoria and consultants during the past four years 898 active cases were discovered.

The sale of Christmas Seals is a benefaction which appeals to everyone who desires to support a humanitarian cause, and through the efforts of the members of the A.C.T. a great many more people will this year be afforded an opportunity of contributing thereto.

Survey Of Accidents

Record Shows 22 Is Dangerous Age For Motor Driving

The dangerous age for automobile drivers is 22.

This is the information contained in a statement issued by the governor's committee on street and highway safety following a three-year study of automobile accidents in Massachusetts.

"Of all operators licensed, approximately one-seventh are 22 years of age or under. Of operators involved in fatal accidents, about one-quarter are 22 or under," according to the highways committee's statement.

"In proportion to the smaller size of this group," the committee's statement reads, "its accident record is enough worse than the performance of the elder class to warrant special attention."

Were Good Spellers

Secretary And Teacher Defeated All Others In Match

A spelling bee was won in New York by two women who were victors in the annual Town Hall Club spelling bee. One, a private secretary, and the other, a school teacher, defeated a university professor, an editor, a foreign correspondent and a dozen others. They were Miss Lou Heinich, the teacher, who won the first of the two sections by spelling "polyphony" and "plagiarism", and Miss Etna Kelley, the private secretary, who won on "necrophagus."

Owing to heavy losses during storage and transit of Australian pears to the United Kingdom, the Australian government has under consideration a plan to provide for the ripening of pears on arrival in Great Britain. This would be a practice similar to that adopted for bananas which are shipped green and ripened on arrival.

Atlantic salmon, unlike those of the Pacific, do not die after spawning.

Little Journeys In Science

AMMONIA

(By Gordon H. Guest, M.A.)

Ammonia is a colorless gas which has a characteristic, pungent, powerful odor. It is about one-half as heavy as air and is very soluble in water. Ammonia gas is easily changed to a liquid. At ordinary temperatures a pressure of about 66 pounds per square inch is sufficient to liquefy the gas.

Ammonia will neither support combustion nor burn in air. Although inactive when dry, ammonia will, in the presence of a small amount of moisture, react with acids to form substances known by the chemist as ammonium salts. For example, on mixing the fumes of hydrochloric acid, which is known commercially as muriatic acid, with ammonia a heavy white cloud of ammonium chloride is formed.

Liquid ammonia is used very extensively in making artificial ice and in producing the low temperature required in cold storage plants. This use of ammonia depends on the fact that it can easily be liquefied at ordinary temperatures by applying pressure. When the pressure is released the liquid ammonia evaporates, absorbing a great deal of heat from the surroundings. This evaporation usually takes place in pipes surrounded by a solution of salt which is not easily frozen. This cooled salt solution may be piped to a cold-storage room, or cans of fresh water may be immersed in it to produce ice.

Ammonia gas is very soluble in water and is therefore usually sold in water solution under the name of "aqua ammonia", which is used as a cleanser both in the home and in the industries. Large quantities of ammonia are used in the manufacture of fertilizers, and in making ammonium compounds such as smelling salts.

Recipes For This Week

(By Betty Barclay)

PEACH CREAM PIE

1½ cups sweetened condensed milk
¼ cup lemon juice
1 cup sliced peaches
½ cup whipping cream
2 tablesp'ns confectioners' sugar
Unbaked crumb crust

Blend together sweetened condensed milk, lemon juice and peaches and pour into crumb crust. Cover with whipped cream lightly sweetened and chill before serving.

To prepare Unbaked Crumb Crust: Roll enough vanilla wafers to make ¾ cup of crumbs. Cut enough vanilla wafers in halves to stand around edge of pie plate. Cover bottom of the plate with crumbs and fill in spaces between crackers. Pour in filling as usual, and cover with whipped cream.

GINGER PEAR JAM

(Using Crystalized Ginger)

4 cups (2 lbs.) prepared fruit
½ to 1 cup diced crystalized ginger
7½ cups (3½ lbs.) sugar
1 bottle fruit pectin

To prepare fruit, peel, core, and crush completely or grind about three pounds fully ripe pears. Dice about ½ pound crystalized ginger.

Measure sugar and prepared fruit, tightly packed, into large kettle. Add ginger, mix well ,and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Remove from fire and stir in bottled fruit pectin. Then stir and skim by turns for just 5 minutes to cool slightly, to prevent floating fruit. Pour quickly. Paraffin hot jam at once. Makes about 11 glasses (6 fluid ounces each).

This product may take a week to reach a usuable set.

Ontario Relief Camps

Will Continue To Function In Northern Part Of Province

Northern Ontario relief camps where 18,000 single men are employed, will be continued indefinitely, irrespective of whatever action is taken by the federal government in the matter of relief contributions to Ontario, the Toronto Mail and Empire said recently.

Premier H. B. Bennett is said to have assured Premier Mitchell Hepburn of Ontario of this at the recent conference of provincial premiers on relief.

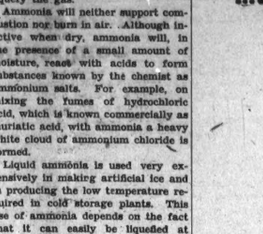

The range of the total weekly wages, including cash and allowances, of married ploughmen in the various divisions of Scotland is as follows: In the southern counties, from $7.84 to $9.30. In the lower Clyde valley, $8.84 to $9.48; in the remainder of the central area, $7.98 to $10.20; and in the northern and northeastern counties, $6.74 to $7.58. In Scotland as a whole, a single plougman's weekly wages is $6.76.—Scottish Journal of Agriculture.

LIGHT

By MANLEY F. MINER
Son Of Jack Miner, Canadian Naturalist

While walking quietly through an evergreen grove recently my attention was drawn to the fact that the trees had grown tall and rank, and as the soil was very rich in food for such trees they were very thick, all growing straight up for light. Each one trying to poke its head out above the other, but on close examination, all the lower limbs were dead while the tops of the trees were much alive. And what was the cause? On close investigation it was revealed that these limbs and lower branches were not getting light. Light that everything needs. Thus, without light these lower shoots from the trees were dying one by one because God's plan is that anything that lives must have light and heavenly food continually, or else they die and perish. And as I looked I thought of how this same example could apply to humanity. If we don't accept light and keep in tune with the infinite God, Nature, or whatever you have a mind to term it, we soon die.

Yes, man might be alive bodily but be completely dead spiritually, and unless he keeps in tune with the God, he is bound to die gradually, the same as the tree does, limb by limb as it misses the light.

After having this thought come to me, as I was alone with Nature, walking through this grove, I went home, and as I love to play my violin, picked it up, only to find it out of tune. Like all other string instruments they get quickly out of tune by the action of the atmosphere. No matter how good your violin may be, it needs to be tuned every day and many times a day. The same can be said of man. The wear and tear of life and the demoralizing atmosphere he often comes in to which sin creates, so affects his disposition that he needs to be brought into harmony with God, in tune with God every day and many times a day.

Thus man cannot live on bread alone, he must have Light and be kept in tune with God between meals.

Jack Miner and Rev. W. A. "Billy" Sunday, the Evangelist. Photo taken on a recent visit of the famed naturalist to Jack Miner's home.

Western Musical Development

Easterner Has Kind Words To Say Of Progress Made

Leo Smith, noted Canadian musician, who has just returned to Toronto from a Western Canadian visit, declared that "a visit to the west is an education." He said music endeavor in the west was already "productive of surprisingly good results."

"It's gratifying to note," he added "that the musical boundaries are not confined to the cities." He said while in Saskatoon persons journey from many country points to attend the music examinations.

"The results ,seemed to show a keenness, vitality, even at times a spontaneity, which, to my way of thinking, rather overshadowed performance of corresponding grades in the east," Mr. Smith said.

Had Good Reason

"Yes, it is really remarkable," observed mother at the head of the table, "Clifford seems to eat twice as much chicken when we have visitors.

"Indeed!" exclaimed the lady visitor. "And, pray, why is that, Clifford?"

"'Cause that's the only time we have it!" replied the truthful lad.

New Camera Invented

A deep-sea camera, invented in Russia, is fitted with a television set hermetically sealed in a special cabinet. The object is to broadcast pictures of monsters and other denizens of the ocean direct from a submarine.

New mine cages, built of aluminum, enable men to descend 1,500 feet deeper than formerly; the new cages are 40 per cent. lighter than old types.

Sea Serpent Is Sighted

Commander Of French Liner Encounters Sea Monster In Azores

Commander Sylvestre, of the French liner Cuba, officially reported to his company that a sea-serpent had been sighted from the Cuba 800 miles southwest of the Azores.

A quartermaster and two sailors corroborated the statement. The monster was from 80 to 85 feet long, shaped like a huge lizard, with a long neck topped by a tiny head, and it had two humps on its back.

It was visible, Commander Sylvestre stated, for about 30 seconds, making four leaps out of the water each time turning its head as though to view the ship.

Effects Of Chewing Gum

The scientific resources of the University of California will be called into pay to answer the question—is a chew of gum good for you? Miss Frances Hopper, of Chicago, gave the university $6,000 "for experimental work on the beneficial or detrimental effects of chewing gum."

Of late years in Scotland, the spread of bracken, particularly in the west, has reached such dimensions that it has become a serious menace to hill farming.

According to the Smithsonian Institution, there have been no major changes in outlines of the oceans and continents since earliest times.

The grebe can fly through or under water as well as it can in the air.

Tarnish can be cleaned from copper and brass by using buttermilk.

Poverty Amid Plenty

Redistribution Of Wealth Will Not Solve Problem

An apt utterance was made the other day by Hon. Duncan Marshall, the new minister of agriculture for Ontario, who said:

"The paradox of poverty amid plenty will not be solved by attempting to abolish the plenty."

The Red orator is not constructive. He would not add to the wealth; he would merely redistribute it. A life's effort by an individual would be destroyed in a twinkling. Such means of securing wealth is no measure of capacity to accumulate or to administer.

If all wealth in Canada were redistributed, the ills of the nation would be corrected only temporarily. The few hundreds of dollars added to those of small estate would soon be dissipated in most cases, and poverty would return.

The mere possession of unearned wealth would not cure human frailty or assure a life of comfort. Robbing those who have, for the benefit of those who now have not, does not remake character or capacity. The mere act of earning a living and husbanding the possession of its fruits builds character. The seizing of wealth not only destroys the maker of it, but destroys also the beneficiary of the vandalism. It weakens his character and leaves him poorer in the end.

No; the solution of the paradox of poverty amid plenty will not be reached by abolishing the plenty.—Toronto Globe.

Pemmican 80 Years Old

Found In A Cache In Alberta, Was Still Palatable

Stewed pemmican, dried buffalo meat, which supplied the Indians with an ample food supply in lean months, estimated to be more than 80 years old, was cooked at the home of William Campbell, a farmer of the Bowden district in Alberta.

Nearly a century old, the pemmican was found in a cache on the Campbell farm during plowing operations. Held in 20 rawhide bags, the meat had hardened into rock-like substance.

"It tasted like meat and had retained some of its original flavor," said Campbell in describing the "test" stew he made of his find.

Pemmican, as made by the Indians, was composed of lean buffalo meat, dried in the sun and then pounded and shredded and pressed into balls, spiced with wild berries.

Concerned Over Forests Loss

Empire Forestry Journal Hopes Canada Awake To Situation

Concern over the losses to Canada's forest wealth from fire, wind and other causes is expressed in a prominent article in the London Morning Post which is based on a review made by the Journal of the Empire Forestry Association. This said the annual losses amounted to nearly one-third of the annual Canadian timber production.

The Journal hopes "the 90 years' supply of wood in sight will not cause Canadian authorities to adopt too supine an attitude." It further remarks that in view of Canada's own development and the almost certain call on her wood supplies in increasing quantities by other countries, it would seem even greater efforts at conservation than any yet attempted are necessary.

The man who invented the process of photography, Joseph Niecphere Niepce, died at Chalons, France, in 1833, poor and unknown.

HOW TO KEEP COOL

Take an effervescing glass of pleasant-tasting Andrews Liver Salt when you begin to feel the heat. At once you will feel cooler—and you'll stay cooler. Andrews not only quenches thirst, but cools your blood. Taken occasionally—say twice each week—Andrews will keep you fit by purifying your system and insuring regular and *complete* elimination. At all druggists. In tins, 35c and 60c. New, large bottle, 75c. Sole Agents: John A. Huston Co., Ltd., Toronto. 28

OCCASIONAL WIFE

By

EDNA ROBB WEBSTER

Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and, Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition, for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and they quarrel. After Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of $1,000. Peter finishes his exhibit and asks Avis and Camilla for suggestions as to a name for it. Camilla suggests "Eager Youth," and Avis "Inspiration". Peter adopts the latter title and Camilla, heartsick, goes to Peter's studio for quiet and to think. Peter and Avis follow later, and as the lights are turned on, see the statue has been shattered to pieces. Avis accuses Camilla of doing this, and Camilla, stunned by the disaster, and hurt and horrified by the accusation, faints.

At Camilla's suggestion, Peter enters as his exhibit a statue he had sculptured especially for her as a wedding gift. They named it "Land of Hope".

Camilla's advertising campaign and Tiny Tots broadcast was a great success, and Mr. Hoyt expressed his pleasure and surprise on learning that Camilla was the author and artist who was so ably stimulating business for his company.

Peter's exhibit was awarded the Paris scholarship, and he prepares for his journey to France. After the ship's departure from New York, he is on his way to his cabin when he meets Avis Werth.

(Now Go On With The Story)

CHAPTER LVII.

Before Peter could recover from his surprise enough to speak, Avis smiled serenely and exclaimed, "Surprise, Peter!"

"Well, hello," he replied with a note of consternation in his voice. "You do have a habit of appearing at the most unexpected times and places."

"And aren't you glad to see me?" she asked in a hurt voice.

"Why, of course," he was rallying to the exigency of the moment. "As a matter of fact, I was just now headed for my cabin and wondering what I was going to do with myself on this slow-going craft for a whole week. But why in the world are you travelling on a tub like this?"

"To see that you are not lonely," she replied coyly.

"That is most considerate of you," he offered gallantly.

"Oh, but I had a selfish reason, also. I didn't want to be lonely on another boat, you see. A week with a good travelling companion can be much shorter than five days alone."

"But I didn't know you had planned to go to Europe, now,"

"Neither did I until two days ago, and you were so busy with your own affairs that I just decided to make it a little surprise to you."

"No doubt about the surprise," he admitted. "What's your destination—Paris?"

"Oh, yes. Always Paris. I travel here and there about the continent when I am over there, but Paris is always home to me. You are still wondering why I am going. It happened this way: I was talking with Professor Drake the other day and he said that in his opinion my talent lies in portrait work, and that the very best thing I could do was to study with Monsieur Boule in Paris. In my enthusiasm, I decided to go at once, and then hit upon the idea of taking the same boat with you, just for the fun of it. If I get over there and discover that I am not prepared to stay indefinitely, I'll take a fast boat back and start all over."

"How convenient it is to have money!" he sighed, smiling.

"You'll be like that some day," she said confidently. "But there is no sense in our standing here like this. I must see that Tillie gets us settled this afternoon; and then for a long, pleasant luxurious week. Do you like the water?"

"I think I do." Peter grinned, "but I've never before been out where it is so deep even as this."

She turned away, then hesitated. "Shall I arrange with the dining room steward to put us at the same table?"

"Why, of course. No sense in two good friends, stranded at sea on the same boat, sitting at different tables and wishing for congenial company. Or wait, I'll arrange for it, myself," he suggested on second thought. It would look better for Avis if he sought her companionship, via tips to the steward.

"Fine!" Avis agreed, and reflected that it might be clever to arrange for the information to reach Camilla that Peter had bribed a dining room steward for a table with her. One could not imagine a man falling more neatly into her plans than Peter had from the beginning. True, it was a slow and tedious campaign, but well worth the time and patience. "See you at dinner, then," she left him gayly.

For two days' notice, Avis' trunks contained a surprising collection of stunning clothes, which might have been purchased for a definite purpose. She might have been on her honeymoon, so alluring she made herself for every day and every occasion of that voyage.

By the third day, it seemed quite natural for them to face each other across the breakfast, luncheon and dinner table; with deck games, contract bridge in the salon, dancing in the evenings or just sitting idly side by side in their deck chairs in the calm, indolent hours between activities.

Peter was seized by a spell of inertia, so easily developed aboard a steamer, and following the strain of busy days over many months—years, in fact. It was the first time he had relaxed from anxiety and work for as long as he could remember. It was so blissful to stroll idly around or lie in a deck chair with eyes closed and caressed by the warm salt breeze, to dream without doing and to plan without action. Avis had convinced him of the wisdom of such a week of idleness. On the second day out, he had protested when she proposed a set of deck tennis.

"But I should be working, Avis. I expected to get a lot of extra things done this week."

"Aren't you the bear for work, though? Now let me tell you what would be the sensible thing for you to do, Peter. Make this week a real vacation. Forget everything except rest and a good time and be ready to leap into Paris in full swing with new ambition. You certainly deserve one week away from your work, while at the same time it would do you a vast amount of good. You must learn to play a little." She was so anxiously concerned for his welfare that he felt a responsive desire to humor her wishes, even while he acknowledged that she probably was right about it.

It was that receptive mood induced by his complete resignation to idleness and pleasure into which Avis subtly sowed her seeds of intrigue that sprouted and flourished into a lusty romance which promised to bud and blossom.

By the third day, Camilla and America seemed vague and remote as to time and space; and Peter was luxuriating in the charm of Avis' gentle flattery, the pleasure of her gay, irresponsible manner, so different from Camilla's harrying confinement to work and ambition and obligation.

Avis captivated him in this period of lassitude and pleasure as she never had done in the atmosphere of work and ambition at the studio. She was part of this life which had seemed so unattainable to him, and she made him feel that he had only to reach out his hand and grasp it. And although the Belgrade was not the epitome of luxury and service to which she was accustomed, it seemed magnificent to Peter who had had so little ease and beauty in his life.

If Camilla's ambition had inspired him and provided him confidence, Avis' holiday mood stimulated his desire to obtain what he wanted by the shortest route, to forfeit an ounce of proud struggle for a pound of easy victory. It wasn't so much her words and actions, as her manner and the way her very thoughts willed him to her viewpoint.

There was also a full golden moon in conspiracy with wind-blown, dimly-lighted decks, in her favor. Sitting side by side, snuggled into steamer rugs, with the vastness of the heaving sea stretching about them in all directions to remind them of the insignificance of man, of the futility of waiting for life while life passed by; talking in intimate tones while the silver sheen of the moonlight and the eerie sound of the waves against the hull of the boat turned it all into a world of make-believe. Prosaic life lost its proportions of importance. It was a mood in which man tells himself that this moment, this hour, is his to do with what he will. Why wait for that which never may be, and remember that which is lost to time forever? The lure of the present is sweetly intoxicating as one partakes of more and more.

Hunt For Dinosaur Fossils Fascinates New York Newspaperman

The search for dinosaur fossils in the Rocky Mountain region is an undertaking filled with drama and romance to Hans Christian Adamson, New York newspaperman.

"They call this Rocky Mountain region new country, just taken away from the Indians, but this land of plains and mountains is older than the human race," he said.

Adamson, a former Albany newspaper and magazine writer and aviator, stopped over in Denver en route to Greybull, Wyo., to join the American museum expedition excavating the fossil beds near there under the direction of Dr. Barnum Brown.

"I'm not a scientist," he declared, "I'm a newspaperman. There's a real story—hundreds of stories—out here in this country that the world ought to know about. Hunting fossil dinosaurs in the west is as fascinating as hunting live elephants in Africa, if you understand how it's done.

"Field men for a museum have to be expert trackers. Their methods are not unlike those of gold prospectors who find evidence in a stream bed and follow it to its source higher up. A bit of fossil bone in a dry gully, washed down by a cloudburst, may give the first clue.

"Farther up, perhaps, some larger fragment may be found. Like the prospector whose pannings get coarser, the fossil hunter knows he's getting 'warmer' in his treasure hunt.

"Finally, if he's lucky, he finds the source—perhaps just a tiny out-cropping of the fossil in the bank. Then comes a lot of digging, and the uncovering of the skeleton of some giant lizard that lived and fought and died out here in the west millions of years ago.

"When you mention dinosaurs, people think of the Gobi desert, thousands of miles across the Pacific.

"Roy Chapman Andrews made the Gobi famous by telling the real story of his fossil hunts there so everybody could understand it. I believe there's a story just as real to be told about the fossil fields of this Rocky Mountain dinosaur country."

Defends The Millionaire

Rich People Have Same Nature As Poor Says Lord Runciman

Lord Runciman, himself a millionaire, has come to the defence of that class. He says that millionaires have souls and that they are impelled by the same passions and desires as other people. Both these positions are sound. The contrary opinion is caused by the fact that a large fortune strikes the imagination and excites admiration in some and envy and anger in others. Both feelings are illogical. There may be as much generosity and there may be as much meanness in a transaction involving five dollars as in a transaction involving five million dollars or more. Human nature is the same in rich and poor. The parable of the widow's mite does justice to the sacrifices made by persons of small means which may be greater than those of the most wealthy of philanthropists. On the other hand a person of very limited means may be greedy and unscrupulous.

The great inequalities of riches and poverty which arouse so much adverse criticism are due to the system rather than to the individual. Lord Runciman mentions a young Czecho-Slovakian who was so shocked to see many of his countrymen going barefooted that he resolved to produce cheaper shoes. He did it and became a millionaire.

Engineers Were Surprised

A swarm of bees which in some way or other found its way to Buoy No. 65-B in the St. Lawrence river off St. Jean Port Joli, Que., was blamed for having extinguished the lights on the buoy. To the surprise of engineers they found the oil line of the powerful lamp completely clogged by countless dead bees.

Opportunity For Dentists

Lack of dentists in Great Britain is causing grave concern. The Dental Board of Great Britain, which controls the register of dentists, is finding great difficulty in securing recruits. The register has to be kept to a level of 14,000 dentists.

The concentration of nectar seems to be the deciding factor in drawing bees to blossoms. They do not like nectar diluted with rain or dew. They prefer their nectar straight.

HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you sprinkle on Dr. Wernet's Powder. Largest seller in world—holds plate so tight they can't annoy yet so comfortable they actually feel and act like your own. Keeps mouth sanitary, breath pleasant—special comfort-cushion prevents sensitive gums from getting sore. Small cost—say druggists.

Movies For Schools

Series Of Educational Films To Be Used In England

Completion of the first seven of a series of educational films intended to be shown in schools throughout England was revealed at a preview in London before an audience of distinguished educators.

The pictures, two and three reels in length, were made under the direction of well-known authorities in various educational lines and explanatory dialogue was provided by these experts. In schools where the auditoriums or classrooms cannot be wired for sound, special explanatory visual titles will be provided, it was explained.

The first seven films completed, which were shown to the educationists at the preview, were: "This Thistle", a complete photographic record of the growth of this plant; "Kitchencraft," production of which was supervised by experts from the National School of Cookery; "Breathing," edited by Professor Winifred Cullis, of the London School of Medicine for Women; "Wheatlands", edited by Miss Mary Field; "French," the first foreign-language educational film to be produced; "Roots," depicting the action of sensitive plant root tips in avoiding obstacles; and "Shakespeare", first of a series designed to provide a background against which famous men of literature and their ideas may be presented.

To Safeguard Drivers

Authorities May Stop Unofficial Testing Of Racing Cars

Now that the trial of Kaye Don has ended, it is stated in British racing circles that the authorities will decide to prohibit the use of racing cars and racing motorcycles on the roads out of official practice hours.

Kaye Don was sentenced by Deemster Farrant to four months' imprisonment for the manslaughter of his mechanic, Francis Taylor, while practising out of official hours for a car race.

An appeal was lodged, and after being in custody for a few hours Kaye Don was released on bail.

The authorities for many years have given a great deal of latitude to the drivers and riders from all parts of the world who come over to take part in the races.

For both the long-standing motorcycle races and the car races of the past two years there are official practice races, for which the roads are closed. In addition, a tradition has grown up that any driver or rider who wished to make additional trials could do so without any risk of serious consequences.

Must Prove Intent

Car Not Stolen If Person Plans To Return It

A public garage attendant in Duluth took a customer's car out at three o'clock in the morning to carry some friends to a restaurant for early breakfast. The car was wrecked.

The owner had a policy insuring him against loss or damage by theft, robbery or pilferage. On trial of an action to recover the insurance company contended that it was not liable as the attendant had meant to return the car; there was no intent to steal it.

The Supreme Court of Minnesota has sustained the verdict on the ground that there was no intention to deprive the owner of his property permanently.—New York Sun.

Use Plenty Of Soap

Who are the cleanest people in the world? If the annual consumption of soap per capita is any criterion, the honors for cleanliness go to the Americans. This announcement was made recently by a German scientific worker who in order to satiafy his own curiosity gathered figures from nearly every country in the world.

Defines An Actor

"Dad, what is an actor?"

"An actor? My son, an actor is a man who can walk to the side of a stage, peer into the wings filled with theatrical props, dirt and dust, other actors, stage-hands, old clothes, and other clap-trap, and say, 'What a lovely view there is from this window!'"

Before egg-grading was introduced into Canada in 1923 by the Dominion Department of Agriculture, the yearly consumption of eggs per head of the population was 17 dozen. Now it is 28 dozen.

Boy babies predominate in hard times, while girls lead in times of plenty, according to Professor Joseph, noted Vienna biologist.

World production of copper approximates more than 2,000,000 tons annually.

Flying Under Difficulties

Imperial Airways Maintain Service Over Dead Sea Area

The difficulties of flying over wild areas are appreciated by H. K. Hales, Conservative M.P. for Hanley in Great Britain. He is an experienced traveller by air and he pays this compliment:

"I would like at this juncture to express my admiration for the marvellous organization which is shown by Imperial Airways Limited. They may be slow but they are sure. I think I am right in saying that there were not more than two occasions when we did not arrive at our destination on time, a thing which I greatly appreciated.

"You have to remember also that the organization of the ground forces and equipment is a great problem. In Penang they have got yet got the aerodrome in order. The ground has just been laid out and levelled.

"And we must not forget the difficulties with the Persian government, which have necessitated us flying down the coast of Arabia instead of Persia and have made it necessary to cover some 200 extra miles.

"Flying over the Dead Sea with a strong adverse wind, we were obliged to return to a desolate tract of country to pick up petrol out of a tank placed there to meet such an eventuality. That is another little instance of how the unexpected may happen at any moment with a full load of passengers and freight for which allowances must be made, and everything done to keep the service up to time."

Of all places in the world the vicinity of the Dead Sea is not the spot to pick for a forced landing. It is hot in the valley, and although Jericho is only a few miles away, there is nothing there but a few Arab huts.—Border Cities Star.

Four Women In Parliament

One Senator, Two In Provincial, And One In Federal House

Although Canadian women have been active in politics since they were granted the franchise towards the end of the war, few have actually gained election to parliament or the legislatures.

At present four women hold seats either at Ottawa or provincial capitals, and one of this number has signified her intention to retire in the next general elections. She is Hon. Mary Irene Parlby, member of the Alberta legislature for Lacombe and minister without portfolio for several years. She will not seek re-election.

The other three holding seats are Senator Cairine Wilson of Ottawa, Miss Agnes Macphail, member of the House of Commons for Grey Southeast, and Mrs. Dorothy Steeves, member of the British Columbia legislature for Vancouver North.

Mrs. Steeves is the latest woman to win a seat, having been elected on the Co-operative Commonwealth Federation ticket at a by-election a few weeks ago. She is not the first woman to sit in the British Columbia legislature, however, as the late Mrs. Mary Ellen Smith sat for a Vancouver seat a few years ago and enjoyed the honor of being the first woman cabinet minister in the British Empire. She was a Liberal and became minister without portfolio.

Creditor Or Debtor

United States Owes Britain More Than Britain Owes Them

"There is no connection whatever between the debt owed the United States by Great Britain and those owed Great Britain by other countries." So argues the legalist, but in the court of commonsense and humanity the connection is very clear. Setting this consideration aside, however, what about the debt owed Great Britain by the United States itself, which is so conveniently ignored by Uncle Sam and which the British government is too polite to refer to? With what Britain has already paid, plus the amount due British holders of bonds of the defaulting states, the war debt has been more than repaid.—Hamilton Spectator.

Any bag, sack, box, barrel, keg, bottle, carton or other container of maize starch (including maize starch cornflour) imported into the United Kingdom is required by a new order to be conspicuously marked with the name of the country of origin.

New White Star Liner

To Be Fitted With The World's Largest Ship's Propeller

The world's largest ship's propeller has left London for Clydebank. This propeller was the first of four specially designed for Number 534 and it was shipped by the steamer "Copeland" to the Clyde where it will be fitted to the liner.

With an approximate weight of 35 tons and a spread of nearly 20 feet from tip to tip of its Manganese Bronze Blades, its shipment occasioned a great deal of ingenuity and skill. Carefully wrapped in a protective covering of sheet iron and canvas it was hoisted on board the "Copeland" by the "Hercules", one of the largest and most powerful cranes used by the Port of London authority.

Before the propeller reaches the Clyde it will make a sea journey of nearly 600 miles. To ensure that the propellers will reach the shipyard in absolute safety, they are being shipped one at a time.

A start has been made at Clydebank in painting the hull of Number 534 for the launching ceremony. When the tens of thousands of spectators assemble at Clydebank to witness the launch they will see that the huge bulk of the ship presents a glittering appearance of light grey and red. The upper part of the hull will be a light grey, whilst the undersea part will be red. Dividing the two will run the white "waterline" of the great vessel.

Scores of painters will be engaged in this task during the coming week, any many thousands of gallons of paint will be used in completing this striking transformation.

THE RHYMING OPTIMIST

By Aline Michaelis

KEY TO DREAMS

The keys on my ring are of little worth,
Leading to things well known;
But here in my hand I hold a key
Found on a paving stone.

Somewhat small for a gate, yet large for a door,
Too long for a sailor's box;
I turn it in my palm again
And wonder what it unlocks.

No symbol of all I have seen on earth
Is as potent as this to me,
And I have no words for the strange allure
Which lies in the unknown key.

Perhaps it might lead to a garden-plot,
A hidden and lovely place;
It might open a door in a foreign land
And show me a dreamed-of face.

And never, as long as I can clasp
Closely this time-stained key,
Will the gates of romance again be closed,
Or the door of dreams for me!

Uncover Roman Theatre

Walls Slowly Emerging From Ground In St. Albans, England

So many people are flocking to St. Albans, England, the Roman Verulamium, hoping to see the Roman theatre whose walls are slowly emerging from the ground that Lord Verulam, in charge of the excavations,, has given orders to admit the public to the area every day between certain hours. All archaeologists agree that this theatre is the only example of its kind at present known in Britain. It follows the normal classical plan and possesses an oblong stage and a semi-circular auditorium, approached by staircases. The spade thus far has revealed nearly one-half of the theatre. From its proportions it is apparent that in its day it would have seated between 1,500 and 2,000 playgoers. The building appears to date from the second century A.D.

Can Recommend Canada

Earl Of Chichester Thinks It Fine For Young People

The Earl of Chichester, who sailed to England after spending seven months in the office of Sir William Clark, British High Commissioner, in Ottawa summed up his views of Canada before he sailed, as follows: "If I were asked by a young man just out of school, I should certainly recommend Canada, but I should also point out that he would have to work hard. Canada is undoubtedly a country for a young man, but he'll have to work."

At the Bee Division, Central Experimental Farm, Ottawa, it has been found that at least two months are required to lay the foundation of next year's honey crop by building up after August 1 a force of young bees capable of withstanding the rigours of the coming winter in a satisfactory manner.

Canadian Turkeys

It was the uniform excellence of grade A turkeys of the Canadian Poultry Pool of Western Canada that brought repeated orders from Great Britain, and this remark may also be applied to the recent export shipments of chickens.

Narcotine is one of the organic bases or alkaloids occurring in opium, in which it usually exists in the proportion of six to eight per cent.

BABY'S UPSET STOMACH Relieved!

Often in hot weather and occasionally at other times, little stomachs turn sour and acid. "When I notice any sign of sick stomach," says Mrs. J. Alphonous Brown, Bayside, P.E.I., "I always give a Baby's Own Tablet." They quickly set things right are very easy to take and quite safe. All common ailments of childhood including teething are promptly relieved with Baby's Own Tablets. 25c a package at drug stores. 188

Dr. Williams' BABY'S OWN TABLETS

Little Helps For This Week

"I form the light and create darkness; I make peace and create evil; I the Lord do these things." Isaiah 45:7.

"All is God that is, and is to be;
And God is good." Let this suffice us still,
Resting in childlike trust upon His will,
Who moves to His great ends, unthwarted by the ill.
—J. G. Whittier.

This then is of faith, that everything which touches us in mind, body or estate, whether brought about by this outward senseless nature or by the will of man, good or bad, is overruled to each of us by the all-holy and all-loving will of God. Whatever befalls us, however it befalls us, we must receive as the will of God. If it is through man's negligence, or ill-will, or anger, still it is to us in the very least circumstance the will of God. For if the least thing could happen to us without God's permission it would be something out of God's control. His providence and love would not be what they are. Almighty God Himself would not be the same God, not the God we believe, adore and love.—E. B. Pusey.

Origin Still Uncertain

No One Really Knows First Significance Of Swastika

Some scholars believe the Swastika is merely a decorative or ornamental design, having evolved from the lotus petal pattern used in early architecture. Some say it was merely a talisman or charm, to be worked in precious metals and worn as amulet or pendant. As a mystic symbol, it is said to have been associated through the ages with fire, water, wind and rain. There are archaeologists who hold that its four points, or feet, indicate the four cardinal points of the compass. It has been interpreted as representing a flame of sacred fire, the sun in its daily rotation and a flash of lightning. Much speculation followed its adoption as the national emblem of the German Socialist party several years ago and many articles were written about it. However, its real origin and first significance are still uncertain. The final word of the swastika comes from the curator of archaeology of Smithsonian Institution. "It is the earliest known symbol or form of the cross and is undoubtedly pre-historic. The name is Sanskrit but the symbol itself existed long before it even had a name."

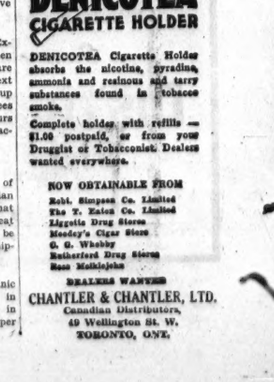

Novel Heating System

Specially-Treated Wallpaper Is Invention Of London Scientist

Heating system of novel design has been invented by a London scientists —working on the principle that the human body is always radiating heat to colder objects. He has invented a system which will raise the temperature of any room as high as that needed for human well-being. This will be done by specially-treated wallpaper connected to the electrical system.

If built today, ancient Roman highways, such as the Appian Way, would cost six times as much as modern improved highways.

Even the woodpecker owes his success to the fact that he uses his head.

DENICOTEA Cigarette Holder absorbs the nicotine, pyradine, ammonia and resinous and tarry substances found in tobacco smoke.

MRS. J. T. PARKER HONORED

Mrs. J. T. Parker, an active member of the Ladies' Guild of St. Andrew's Church, was made the recipient of a beautiful silver cake dish, on the occasion of their opening Fall meeting held at the home of Mrs. J. N. B. MacDonald on Wednesday, Sept. 12. In making the presentation, Mrs. E. L. Misener, on behalf or the Society, expressed their sentiments of regret that they are going to lose a valued member and one who during her 28 years residence in Lacombe has made such a large circle of warm friends. Many parties have recently been given in honor of Mrs. Parker, and on Friday evening, the Last We Forget Club, of which she is a member, plan a banquet at the Adelphi Hotel, with Mrs. Parker as an honored guest. On Saturday morning, Mrs. Parker will leave to take up her residence at Argyle Court, Calgary. Mr. Parker, an Inspector in the Child Welfare Department was transferred to Calgary, and took up his duties there on Sept. 1st.

STOP DEPARTURE OF MORRO CASTLE CREW

New York, Sept. 11—The World Telegram said today that federal agents were rushed this afternoon to the Ward liner Siboney on a tip that members of the Morro Castle crew were attempting to leave this jurisdiction before they should testify.

ROOSEVELT WANTS FIREPROOF SHIPS

Hyde Park, New York, Sept. 12—Aroused by the Morro Castle disaster, President Roosevelt wants the United States Congress to enact legislation eliminating wooden passenger ships and requiring fireproof construction.

CADOMIN MINER KILLED TUESDAY

Cadomin, Alta., Sept. 12—Gustavus "Black Gus" Toderoff, first driver in the Cadomin coal mine, fell under a car trip Tuesday night and was instantly killed. He had been employed here since 1916.

OPEN MURDER PRELIMINARY TRIAL

With only a few of the available witnesses being called to the stand, the preliminary hearing of the murder charge against Thomas W. Higginson got under way in Edmonton Police Court Wednesday morning before Magistrate Primrose.

BLAIRMORE MINER FATALLY INJURED

Blairmore, Alta., Sept 11—Joe Walek, 45-year-old miner, was fatally injured when struck by an automobile on a Blairmore street Tuesday night. He died as he was being carried into the Blairmore hospital.

FIVE BURNED TO DEATH IN GASOLINE BLAST

Anchorage, Alaska, Sept. 12—A mother and her four children were burned to death Tuesday in a fire caused by gasoline in their house at Eagle, on the Yukon River.

They were Mrs. Andrew McDonald; William, 16; Christina, 14; Davis, 12; Grace, 1.

The husband started a fire for breakfast and stepped outside the house for an armful of wood when the gasoline ignited and exploded with a flare that covered the house with fire.

BOUGHT TICKET IN 1870 ASKS MONEY BE RETURNED

Chicago, Sept. 12—John Watt isn't going to take that train ride he bought a ticket for in 1870—so he wants his money back.

The Chicago office of the Canadian National-Grand Trunk Railways reported recently that Watt, who lives at Auburndale, Mass, bought the ticket in Chicago for passage between Detroit and Boston.

Watt presented the ticket Monday with the request for his money back. The ticket, Watt said he was told was good "until used."

PREPARE YACHTS FOR FIRST RACE OF AMERICA'S CUP

Bristol, R.I., Sept. 12—Final preparation of Endeavor, T. O. M. Sopwith's British challenger for the America's Cup for her meeting Saturday with the defender, Harold S. Vanderbilt's Rainbow, was begun yesterday at the Herreshoff yard.

STUDENTS EXPENSIVE SLEEP

Orange, Cal., Sept. 12. While Grant Goddicksen slept in his automobile, thieves stole $29 in cash from his pockets, both bumpers from his automobile, a spare tire and a wheel, radiator cap, coat, sweater, set of tools, and a tie clasp.

BRITISH SHIP AFIRE AT SEA

Cristobal, C.Z., Sept. 12—The British freighter Bradburn, carrying a cargo of cotton and phospate, out of Tampa, through the Canal Zone, and bound for Kobe, Japan, reported today she was afire. The Bradburn reported she was returning at full speed to Balboa, from which she sailed on September 9.

SEASON OPENS AT NOON, NOT SUNRISE

The season for Hungarian partridge and ducks will not open until 12 o'clock, noon on Saturday, Sept. 15, an official of the provincial game branch informed the Western Globe today.

Owing to the fact that the licenses issued do not state the time, there was an impression among hunters that the season would open an hour after sunrise on Saturday, the official stated. In refuting this he said that the act definitely states the hour as 12 o'clock noon.

WOMEN'S INSTITUTE

The demonstration on Interior Decorating sponsored by the Women's Institute, and held for three days this week in the Oddfellow's Hall, has been well attended, many of the ladies taking advantage of the opportunity to learn rug making, the painting of table centre-pieces, working shopping bags, re-upholstering chairs, etc.

THUG ROBS EDMONTON DRUG STORE, TAKES $26.00

A masked bandit who worked unaided, held up Norman J. Gardner, 26, manager of Merrick's drug store, at 100 st. and Whyte ave., at the point of a revolver, scooped $26 in bills and escaped in the darkness about 11:35 p.m. Monday.

Police from south side station answering Gardner's hurried call, failed to discover a trace of the bandit.

STANDARD SLEEPER ACCOMMODATION

Due to increased travel and to meet the demand for sleeping car accommodation, the Canadian Pacific Railway has decided to continue its standard sleeper service between Winnipeg and Vancouver on trains 1 and 2, it was announced today by G. D. Brophy, District Passenger Agent, Calgary. This is the first time in latter years that this service has been continued beyond the summer season and is regarded as an indication of the continuance of improved general business conditions throughout the West.

EASTERN BARGAIN FARES

For those who desire to visit Eastern Canada during the early Fall when the apple and fruit harvest is at its height, the announcement by the Canadian Pacific of bargain fares offers an economical trip.

Tickets will be on sale Sept. 21 to Oct. 2 from stations west of Port Arthur to stations east of Sudbury, with return limit of thirty days. Tickets will be honored in coaches or in tourist sleepers at slightly higher plus berth charge.

Coach return fares as announced by Mr. G. T. Jackson, Ticket Agent, are from Lacombe to Toronto, $40.25; Ottawa $40.90; to Montreal $43.25 and full particulars will be gladly given regarding other fares upon application.

EDMONTON HAS FIRST SNOW FLURRY

Following the cold rainy day, Tuesday, Edmonton had a small snow flurry Wednesday. 1 inch of snow is reported at Fort St. John.

LABATT SUSPECTS ARE IDENTIFIED
OFFICIAL REPORT

Toronto, Sept. 11—Names of two men were announced Tuesday by Attorney-General Roebuck as suspects wanted in connection with the kidnapping last month of John S. Labatt, wealthy London, Ont., brewer.

The first was given as Albert Pegran, know also as Albert Leon and Jack Knead. The other's second name only was given as Meisener. Both are suspected of being members of a border gang.

PORT ORDERS MADE DRASTIC AT HAVANA

Havana, Sept. 11—Havana port officials today laid down orders for the drastic vigilance of all vessels in port, cancelling all passes to board the ships as a step in the investigation of the Morro Castle disaster.

SABOTAGE SUSPECTED IN S.S. MORRO CASTLE FIRE

New York, Sept. 11—The Daily News quotes the widow of Captain Robert Willmott of the Morro Castle as saying he knew that the threat of sabotage hung over the vessel, and that he tried desperately to avert it.

The newsi also says the widow is suspicious of the captain's sudden death a few hours before the fire.

"I can't understand his dying of heart trouble brought on by acute indigestion as reported," she said.

This Changing World

Probably no period of recorded history can show such a succession of surprising and kaleidoscopic changes, political and economic, as that through which we are passing. The vast complex of peoples and nations comprising the civilized world to-day is in a state of uniformly unstable equilibrium—an equilibrium disturbed from time to time by a variety of insurgencies both major and minor. So frequent are they, so unexpected their character, so far-reaching their effects, that few even of the great among the prophets dare risk portraying the face of things to come in the immediate future. They feel safer in making (and indeed they prefer to make) their predictions at long range, and to envision a world more remote in time than that which is likely to concern much the present much-abused generation.

The political and economic changes which occurred during the storm years of 1914-18, the revolutionary upheavals which wrecked dynasties and brought new state forms into being, probably were larger in scale. But they were not so numerous nor, for that matter, did they strike with ruder shock than those of more recent occurrence. The protracted strain of the war itself served to dull and deaden the sensibilities of the people directly subjected to it, and, more inured to shock, they were inclined to lump all the catastrophies into one—the War. They were inclined, too, to the belief that, once peace were restored, the world would quickly revert to the pre-war basis and settle anew to the ordered routine which seemed so stable until the unexpected happened at Sarajevo.

The world, however, has refused to settle down, refused to revert to the former status. The well-ordered machine which made this seem the best of all possible worlds until the summer of 1914, has never regained its old momentum. The people hanker for peace and a chance to routine their existence. They wish to remodel the new world on something like the old lines. But peace is denied them—peace, security and comfort, the comfort which comes from an assured livelihood. All is unrest. They feel they sit upon a volcano about to erupt, and nerves agitated by uncertainties make them the more susceptible to the recurrent shocks which evidence the turmoil beneath. Thus the crises of the depression appear more menacing than those which occurred during war-time which stunned, rather than agitated.

Recent events in Austria and Germany are symptomatic of the times. The world looks on with anxiety while these two nations writhe in their efforts to evolve a state form which can bring harmony and happiness to their peoples. Equally significant in the world at large, however, are the experiments being tried in the United States and in Great Britain to evolve a new economy which will give work to the workless and restore the prosperity both, in the past, have enjoyed. Both experiments involve complete revolutions in the national economic life of those countries, but few would agree that either yet had found the solution within itself.

It is unnecessary to enumerate the many changes during the period of depression. Books on political and economic subjects become obsolete in a day. Anyone who reads knows that. Take, for example, the following quotation from a book which reached shelves of public libraries in Western Canada little more than a year ago:

"Nobody doubts, for instance, that America will overcome the present difficulties once it gets a grip on itself. France is sitting comfortably, and even Germany is held to have a fair chance But the issue is more doubtful for Great Britain because her malady seems more fundamental. Already, the British Empire has fallen from its former high estate."

The picture has been entirely reversed since then. Scarcely a statement in the quotation stands to-day—and that is but a sample of the dangers besetting the would-be prophet in this dynamic, fluid world. Apparently, the unstable condition will continue until every nostrum and every alleged cure-all has been tried and tried in vain. Then perchance, a world on the verge of ruin will realize that it is not so much the medicine that is wrong as the diagnosis. Indeed, were international enmity replaced by international amity almost any kind of political or economic medicine might cure remaining ills.

Canadian Farm Implements

Large Shipments Of Canadian Machinery Go Abroad

It is evident that Canadian farm implements and machinery are enjoying increasing popularity abroad. An increase of almost 70 per cent. was recorded in June, when exports of these commodities amounted to $327,192, as compared with $192,554 in the same month of last year. During the twelve month period ended June, 1934, exports of farm implements and machinery increased to $2,337,554 from $1,263,562 during the previous twelve months.

Outstanding items in June were cream separators to Australia valued at $3,308; 285 harvesters and binders to New Zealand at $43,220, and 35 to Denmark at $4,862; 100 mowing machines to Chile at $6,551 and 98 to British South Africa at $5,735. British South Africa also purchased 1,164 cultivators valued at $8,683, harrows at $4,239, and ploughs at $44,818. Ploughs to the value of $14,892 were shipped to the United States, to the value of $7,193 to the United Kingdom, and $7,012 to Argentina.

Grain Duty Free

Under the authority of the Reich cereal organization, rye, wheat, pelt, barley and oats in all quantities may be imported into Germany duty free until July 31, 1935, according to the decree issued by the ministers of finance and agriculture. However, it was believed the cereal organization is only likely to permit imports when a shortage in Germany is acute.

Great Britain spent 232,500,000 pounds sterling on alcoholic beverages in 1933.

The water ouzel is the only song bird that has learned to dive into the water for its food.

Realises Its Value

Governor-General Is Patron To Junior Farm Clubs

Club members and everyone associated with club work for farm boys and girls will sincerely appreciate the great honor that has been accorded to the junior farm club movement by His Excellency the Governor-General, the Earl of Bessborough, who has extended his patronage to the Canadian Council on Boys' and Girls' Club Work.

The recognition that His Excellency has thus given to the value of junior club work in Canada should encourage greater activity on the part of every club member and stimulate a deeper sense of the opportunities that are provided in this form of agricultural extension.

Criminals Steal Arms

1,027 Guns Taken From U.S. Armories Since 1932

The underworld has stolen 1,027 guns—ten of them machine-guns—and 23,110 rounds of ammunition from national guard armories in 29 states since January 1, 1932, Wm. Iliam Stanley, acting United States attorney-general, gave the information.

At the same time he revealed the department of justice has asked the war department to prevail upon state governors to end these thefts. Stanley reminded that the federal machine-gun law which took effect recently, is intended to close fire-arms channels to the criminal.

Synthetic violet and rose perfumes are now being made from the oils from grapefruit skins.

Nearly $170,000,000,000 of American money is privately invested in foreign countries.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Dr. FOWLER'S EXT. OF WILD STRAWBERRY

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and oftentimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing-up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 88 years—you do not experiment when you use it.

Stately London Houses Are Fast Disappearing

Apartments Being Built On Many Sites In Mayfair

In the changes which have taken place in London since the war no section of the metropolis has been more startlingly affected than Mayfair, its social hub. Here is where many famous residential squares have been transformed, and the transformation has meant the disappearance of numerous stately houses or mansions identified with the political and social life of the capital for generations. The latest of the big mansions to come into the hands of the house-breakers is Chesterfield House, until recently the London home of the Princess Royal (Prefness Mary) and her husband, the Earl of Harewood, writes a correspondent in the New York Sun.

Like most of the mansions which have been demolished, Chesterfield House will make way for apartments. It was built for the great Lord Chesterfield, who spent so much of his time writing letters of advice to his son, and whose acquaintance was so highly esteemed by the notables and social climbers of his day. The "housewarming" at this mansion was recorded by Horace Walpole, who said: "An immense assembly at my Lord Chesterfield's made to show the house." Its magnificent marble staircase was taken from a house belonging to the Duke of Chandos in the 18th century. In the state dining room now being dismantled were often gathered royalty and the celebrities.

The house and gardens cover almost an acre of land, on which will soon rise a block of apartments. It was in 1919 that Lord Harewood (then Viscount Lascelles) bought Chesterfield House from the Dowager Lady Burton. It was built in the first half of the eighteenth century from the designs of Isaac Ware, for the fourth Earl of Chesterfield. The famous staircase of white and veined marble will be, of course, preserved.

Seeking New Height Record

Wiley Post Will Use Flying Suit He Invented

With a specially constructed flying suit of his own invention, Wiley Post, world-circler, will soon take off in an attempt to better the present altitude record of 47,352 feet.

His well-known companion, the "Winnie Mae", a ship almost as famous as Lindbergh's "Spirit of St. Louis", has been remodelled with the addition of a new 420-horse power motor and two superchargers so that her speed is expected to be increased to 350 miles per hour at ordinary altitudes, and seemingly impossible velocities in the stratosphere where air resistance approaches "nil".

Post's flight is not primarily for purposes of breaking records, but to test his airsuit, he has announced.

"Engineers have always said if we had a variable pitch propeller and a super-charged motor we could fly in any altitude if the body could function normally," Post explained. "Well, we have the propellers and the supercharger and I believe this suit will conquer the last obstacle."

The suit consists of rubberized fabric trousers covering the entire trunk of the body up to the shoulders and a rubber top piece capped by an aluminum head gear. The wearer will get air through the supercharger, which also supplies the motor. The suit, of course, is air-tight.

Post hopes to get enough information in his initial test to aid him in winning the $50,000 London-to-Australia derby next October.

Mysterious Fish

Sea Divers Encounter Strange Denizen Of The Deep

A mysterious deep sea fish, 20 feet long and illuminated by myriads of tiny lights was seen in the waters of Bermuda by Dr. William Beebe and Otis Barton, United States scientists during a dive in their "bathysphere" in which they achieved a new depth record.

Sealed in their two-ton iron ball, the scientists spent five minutes at a depth of 3,028 feet, beating their record by 518 feet and passing their goal of half a mile by 388 feet.

At 2,750 feet in the descent, Beebe observed a large gray shadow. Signalling for a halt, he tried to distinguish what appeared to be an unknown denizen of the deep. He said he was unable to identify it.

The scientist described the strange fish as illuminated by myriads of tiny lights, glittering like a diamond tiara around the object. It was assumed the lights were made from phosphorescent parasites. Dr. Beebe said he thought the monster was the largest he had ever seen in a deep sea dive.

Food Value Of Egg

The value of eggs as food cannot easily be overestimated. They are rich in protein and in fat. The former is an important body-builder. It repairs tissues that have been used up, and is, therefore, of considerable value to growing children. The fat found in the yolk contains vitamin A, which helps to build and is also protective against disease.

Bridge and bridge tournaments are regarded as gaming in England.

Courage Won Out

Man's Eternal Safeguard Brought Nova Scotia Sailors Ashore

Wrecked by an explosion, 126 miles east-southeast of Sable Island, the little schooner Astrid W. of Lunenberg, Nova Scotia, has fetched her last port. But Skipper Walter Crouse and his thirteen shipmates are safe ashore and great is the joy in the homes of Lunenberg.

Five were taken up from the sea by a passing Norwegian tramp soon after the mishap. But another boat bearing the captain and eight others became lost in the fog and darkness. It made shore unaided. For five days they tossed helplessly — nine men cramped in a dory with less than a gallon of water and a handful of biscuit. Day after day the men rowed and bailed their crowded boat. Several times ships steamed by at a distance without seeing their signals of distress.

Such is the tale of their grim struggle for survival—a tale of suffering and suspense, of shipwreck and peril at sea, that touches the hearts of seafarers and landsmen alike. It took courage to struggle for five days against the sea and against hunger and thirst and fatigue; and a sublime example of practical prayer to set a dingy scrap of canvas to the winds when waning strength had silenced the stolid rattle of the oars.

Theirs was an experience which seldom befalls seafarers under modern conditions, an experience that belies the belief that the traditional endurance of "wooden ships and iron men" belongs to a departed era. What is the "iron" that inspires admiration but human fortitude seen in the expression of man's eternal right to live? Hope and faith are attributes that cannot be circumscribed within the mere limits of time and place.

That courage is man's eternal safeguard, the castaway fishermen of the Astrid have manifested to an inspiring degree. In their triumphant overcoming of the elements, they prove the aptness of the Psalmist's words:

"They that go down to the sea in ships, that do business in great waters; these see the works of the Lord, and His wonders in the deep."—Christian Science Monitor.

Rock Slide At Niagara

Huge Chunk Weighing Thirty Million Pounds Goes Over The Falls

A gigantic pile of rock estimated to weigh 30,000,000 pounds rose above the water in Niagara gorge recently, visible evidence of the second major rock slide from Horseshoe Falls since 1931.

Water was flowing over what was dry rock as sightseers thronged to the shore of Goat Island in an effort to obtain a view of the jagged, saw-like rim of the falls and the huge pile beneath it. But mist obscured the view, shrouding the secret of Nature's wonder.

The huge chunk fell from the cataract with a deafening roar that seemed to still the sound of water pouring over the precipice. The rock landed in the gorge, sending a spout of water more than 200 feet into the air.

The lip of one of Canada's great wonders lifted as if from a charge of dynamite, heaved, groaned and slid away with a roar. Where there was only a dribble of water a huge stream began to pour.

Niagara Falls, in its recent break, demonstrated a geological belief that this scenic wonder is only the last of the American Niagaras, and like the others, is headed towards extinction within perhaps 20,000 years.

Modernize British Army

Every Department Of Army Service To Be Brought Up-To-Date

The British army equipment and organization will be modernized soon, the newspaper "The People", reports.

"Henceforth every infantry brigade will consist of a 'heavy' battalion equipped with heavy machine-guns and trench mortars and three 'light' battalions armed with automatic rifles of a new model and individual machine-guns of very small calibre," the paper said.

"The Royal Horse artillery will be completely motorized and equipped with howitzers of 3.7 inches calibre," it added.

"Sappers will have their picks and shovels replaced by pneumatic tools of the kind often seen among private building undertakings. Another important addition will be giant shovels operated by gasoline motors."

British Dominions Emigration Society

Secretary Returns To England After A Visit To Canada

Concluding his forty-second visit to Canada from Britain, Robert Culver, secretary of the British Dominions Emigration Society, returns on the Cunard White Star liner Ascania from Montreal.

"I am impressed," declared Mr. Culver in an interview, "with the improvement in Canadian business conditions over last year. There are many signs of material progress and a feeling of returning confidence among influential people I have met here this year. I feel that before long we shall have a greater opportunity of increasing the work of our society in the Dominion."

"The British Dominions Emigration Society was founded in 1882 by Prebendary Kitto. During these 52 years over 37,000 have been assisted to emigrate, and the feature of the work I am most proud of is that we have never charged one cent interest on the money advanced. It was not surprising therefore, though most gratifying to our society, to receive a commendatory letter from your Prime Minister, the Rt. Hon. R. B. Bennett, paying warm tribute to our work upon the occasion of our 50th anniversary. At the present time our work is almost entirely confined to the re-union of British families."

The society enjoys the high presidency of H.R.H. Princess Louise, Duches of Argyll, and a list of distinguished vice-presidents which includes The Most Noble the Marquess of Salisbury, K.G., G.C.V.O.; The Right Hon. and Right. Rev. The Lord Bishop of London, The Right Rev. The Lord Bishop of Stepney, The Right Hon. Lord Lloyd, The Right Hon. Lord Middleton, Sir Archibald Weigall.

The society's Canadian manager is R. Gordon Burgoyne of Montreal; the local committee includes many business and professional leaders.

Committees of similar calibre cooperate with the society in Toronto, Halifax and Saint John, N.B.

Assistance to emigrate takes the form of grants or loans made under varying conditions to suit circumstances, to British-born subjects of good character and sound health; also of advice and help to settlers after their arrival.

"It has been found by our representatives in Canada," Mr. Culver said, "that large numbers of men go out, leaving their wives and families behind, with every hone and good intention of soon being able to send for them. They make good in the various cities and towns throughout Canada, but very quickly find that after keeping themselves and sending money home to help to keep their wives and families in Britain, it is utterly impossible for them to save the amount required to bring their wives and families out. One of two things is then bound to happen—either the men have to throw up their good permanent work in Canada and return to the Old Country to swell the ranks of the unemployed there, or they have to receive assistance towards the cost of the transportation of their wives and families. We are very glad indeed to be able to take up this work, which we feel is of considerable importance."

Robert Culver and R. Gordon Burgoyne of the British Dominions Emigration Society, who returned to Britain on the White Star Liner Ascania

Makes "Color-Music"

Attachment For Piano Invented By English Engineer

I. Shamah, English electrical engineer, has invented an apparatus for making "color-music" which may be used in any home as an attachment to a piano. By means of this, a drawing room may be flooded with diffusing lights which will automatically react in colors to whatever tune is played. He has so graded the vibrations of a piano in proportion to each other that each note has its own exact shade, so that it will be possible for instance, to play "God Save the King" in a combination of shades varying between red, white and blue; the "Blue Danube" in green and blue, or the "Moonlight Sonata" in yellow and silver. Another invention by Mr. Shamah enables one to "feel" music. You hold two metal tubes and when a tune is played you feel the rhythm of it like a beating pulse, which send a pleasant tingling sensation up the arms.

Telephone Of The Future

Eighty-Three-Year-Old Scientist Working On Improvements

Sir John Ambrose Fleming, a celebrated scientist who has had a good deal to do with the development of telephones, is the inventor of the thermionic valve—which made wireless telegraphy possible. "In a few years' time," he said the other day, "we shall probably chuckle over the recollection of what telephones were like in 1934. Everybody knows that the telephone is in its infancy; everybody knows that it can be improved enormously. What form will that improvement take? I am a scientist, not a prophet. The telephone may be a little box that you can carry in your pocket. It may become more elaborate than it is today. I do not choose to prophesy. I'm certainly not going to tell you on what lines I am working now to improve the telephone." Sir John Fleming is 83, and a very busy 83.

Making The Roads Safe

British Courts Do Not Handle Reckless Drivers Easily

British courts are ruthless with motorists who carelessly endanger the lives of others. Kaye Don is under sentence on this account, and another example is to hand in the sentence of a girl, recommended to mercy by the jury and therefore getting off with half the term the judge had intended to impose, sent to jail for six months for manslaughter. She said she had been ill and took some gin to relieve the pain, and had had three bottles of beer as well as the gin. Her driver's license was revoked and she was disqualified for life from driving. That is the way to make the roads safe.—Hamilton Herald.

Up To The Architect

Instead of saying that man is a creature of circumstances, it would be nearer the mark to say that man is the architect of circumstance. It is character which builds an existence out of circumstance. From the same material one man builds palaces, another hovels, one warehouses, another villas. Bricks and martar are mortar and bricks until the architect can make them something else.

Made Fast Trip

A homing pigeon, owned by Arthur Milner of Sault Ste. Marie, made a hop of 501 miles from Minneapolis to Sault Ste. Marie, in 25 hours. It released at Minneapolis one day at 9 a.m., the bird arrived at 10 a.m. the next day.

"Women don't go in for exploring," says an explorer who has never watched one look through 75 articles in a handbag looking for a dime.

The First Motorcycle

Fiftieth Anniversary To Be Celebrated In Germany This Year

The fiftieth anniversary of the first motor-cycle is to be celebrated this year; a monument is to be erected to Gottlieb Daimler, in Schorndorf, Germany. Working behind the shutters of a shop in Stuttgart, Daimler and Wilhelm Maybach made the first motor-cycle, and in the same year the first motor-boat was launched in the river Neckar, a tributary of the Rhine. Believing the inventors were manufacturing counterfeit money, the police raided their workshop, and as there was considerable public fear of petrol, wires mounted on porcelain insulators were placed around the premises to give the impression that the motive power was electricity. In the following year the first "horseless" carriage left the shop. It was an ordinary horse-drawn carriage with metal tires in which one cylinder of 1½ horsepower was mounted. It achieved a speed of eleven miles an hour.

A Pulpit On Wheels

Sexton Places It Where People Can See Minister

In the Church of St. James, Clovelley, is a pulpit on tram lines. The pulpit which existed before 1888, was very high and ugly, so it was decided to cut it down to its present proportions. When placed in a certain position in the church it concealed the altar, and when in the only other suitable position, people in the gallery could not see the preacher. Now, before the sermon, the sexton pushes the pulpit on its lines to the centre of the church, and after the sermon it is pushed back again.

Brazil is chiefly an agricultural country and the diversity of climate facilities the cultivation of practically every agricultural product. Nevertheless, Canada in the fiscal year 1933-34 exported $327,511 worth of agricultural and vegetable products to Brazil, including wheat and showing an increase of $202,108 on the preceding year.

Gigantic Wine Cask

Heidelberg's famous cask will be a mere barrel compared to a wooden giant under construction at Bad Duekheim, Germany, and destined to be the world's largest wine vat. Resting on foundations of concrete it will have a capacity of 350,000 gallons, against the mere 50,000 gallons of the Heidelberg barrel.

The California Institute of Technology has built a 1,000,000-volt X-ray tube.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile —Without Calomel

Your liver's a very small organ, but it certainly can put your digestive and eliminative organs out of kilter, by refusing to pour out its daily two pounds of liquid bile into your bowels. You won't completely correct such a condition by taking salts, oil, mineral water, laxative candy or chewing gum, or roughage. When they've moved your bowels they're through—and you needn't feel stimulated.

Carter's Little Liver Pills will soon bring back the sunshine into your life. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. 25c at all druggists. 48

HEAVY WAXED PAPER

Appleford PAPER PRODUCTS HAMILTON, ONTARIO

Proposals To Change B. N. A. Act Will Be Considered At Dominion Provincial Conference

Proposals to change the British North America Act—Canada's constitution—will be up for consideration at the next conference of Dominion and provincial governments.

When the conference in July concluded, Premier R. B. Bennett suggested to the provincial premiers they meet again in October. This was regarded as a tentative date. It may be earlier or later but in any event it will be before the next session of parliament.

Under the B.N.A. act, social services, direct relief and similar responsibilities were placed on the shoulders of the province and the fields of taxation were defined as between the provinces and the Dominion with these responsibilities in mind. In view of the wider field of taxation allotted the Dominion, it was provided that the provinces be given annual subsidies from the federal treasury. These have been revised from time to time.

The depression has entailed so much relief and social assistance that it has been contended they have become national problems and should be a Dominion responsibility. The Dominion has recognized this by carrying a considerable portion of the financial load. At the last conference the Dominion changed its policy in this connection and, instead of bearing a percentage of the direct relief regardless of how extensive it might be, in the future will make monthly grants of stated amounts to the provinces and the latter will look after administration without interference on the part of Ottawa.

The Dominion also contributes 75 per cent. of old age pensions paid by the provinces and there is also a movement to have unemployment and health insurance inaugurated. All these are provincial responsibilities although it is frequently argued they could be better administered as national undertakings instead of piecemeal with each province having a distinct system.

The provinces, particularly Ontario and Quebec, have been very jealous of their provincial rights and on many occasions appeals have been carried to the privy council in London or as it is commonly described "to the foot of the throne," when they felt the Dominion was infringing on their jurisdiction. Not infrequently the provinces have been successful in these appeals.

The Dominion takes the view that changes are necessary in the B.N.A. Act if it is to undertake relief and social services on a national scale. It might be necessary to change the subsidies of the provinces as well as extend the Dominion's jurisdiction.

At the conference in Jan. 1933, Premier R. B. Bennett laid down proposals in an agenda to broaden the federal powers to cope with such situations but at that time some provinces were not prepared to surrender their jurisdiction. There have been many changes in provincial governments since then.

Many are insistent that the Dominion carry a considerable portion of the load of relief because they claim the provinces are not to blame for conditions that have caused widespread unemployment. They may be more inclined to give the Dominion the power necessary to make unemployment a national obligation.

Although minor changes have been made in the B.N.A. Act, no such fundamental changes as now suggested have ever been made since the act was passed uniting the provinces into the Dominion.

War-Time Vigilance

U.S. To Keep Track Of All Food Supplies For Winter Months

Planning war-time vigilance over food and feed supplies in the United States for next fall and winter, the federal farm administration also is preparing drastic revision of its 1935 crop control programs.

Official government estimates are for the lowest crop production in more than 30 years because of continued drouth. Therefore, the agriculture adjustment administration has undertaken a day-to-day watch over conditions and is starting an inventory of the food and feed supply which will form the basis for guiding its work during the coming year.

Next year's wheat plan is likely to call for the same acreage planted during the years 1927-32, rather than a 15 per cent. reduction from that figure. Necessity for this move grew from the prospective cut in the carry-over from this year's excessive figure of 270,000,000 bushels to about the normal of 125,000,000 bushels.

British Cheese Makers

British farmers registered as farm cheese-makers with the Milk Marketing Board of Great Britain last month numbered 1,284, owning 54,000 cows with an estimated output of milk of 22,000,000 gallons per annum.

Robins sing and mackerel swim while asleep, elephants sleep standing up, and ants on awakening yawn and stretch like human beings, according to a French naturalist.

Scarcity Of Ducks

Movement For Closed Season On North American Continent

Scarcity of ducks has brought a strong movement for an entirely closed hunting season on the North American continent in an effort to preserve the remnants of once mighty flocks of wild fowl.

Many sportsmen are backing the movement, realising that delay may mean disappearance of ducks to such an extent that hunting will be a thing of the past.

Marshes of southern Saskatchewan, once a great breeding ground for ducks, through drought chiefly, no longer contain wild fowl to any great extent.

A warning of the critical condition is contained in a statement issued by F. Bradshaw, director of the Saskatchewan provincial museum. Admitting he cannot answer the question "Where are the ducks?" Mr. Bradshaw reports that a search of areas formerly occupied by thousands of the birds has this year proven futile.

"Many sportsmen," he says, "who now recognize the calamity that has befallen the ducks are advocating an entire closed season, but whether the large majority of sportsmen would be willing to go to such lengths, however desirable, is somewhat doubtful." An aid to the plight of the wild fowl population, he adds, would be for individuals to refrain from heavy slaughter of ducks.

Drought in the southern part of the prairie provinces has driven wild fowl far north in recent years, according to Luther Goldman, U.S. government biologist, who was a visito to Regina. Within the past 30 years, said Mr. Goldman, the duck population has been cut in half.

Majesty Of The Universe

Beauty And Mystery And Fascination Of The Stars

Recently on this page there appeared two short editorials on that ever-fascinating mystery, the stars, says the Winnipeg Free Press. Apropos them, a correspondent calls attention to a lecture given a short time ago at the Royal Institution by Sir James Jeans, a noted astronomer.

Sir James pointed out a few of the known facts about the stars, and the age of the sky. Altogether there are about 100 million stars. They are scattered in the heavens, to form our universe, in the shape of a gigantic cart wheel; of which the Earth is, curiously enough, nearly at the hub. This wheel goes around with a slowness that is awesome in its majesty, for each revolution takes 250 million years! And, claims Sir James, there are many similar cartwheel universes turning with dignified deliberation through the vast void of space.

During the whole of the world's civilized epoch, the wheel that is our universe has only moved as much as the hour hand of a clock moves in one second. And, as if this information were not enough to stagger a mere man, Sir James claims that our universe has turned in this manner through several thousand revolutions!

These facts, and speculations, however, do not detract one whit from the beauty and mystery and fascination of the stars in the sky, when all that spangled host keeps watch in squadrons bright. And man, while he may not quite comprehend the tremendous size, in space and time, of the heaven's ebon vault studded with diamonds, can at least gain courage and inspiration from gazing upon the magnificent spectacle.

Practice Is Condemned

Prosecutions Where Officers Are Entitled To Part Of The Fine Are Wrong

Moiety cases — prosecutions from which prosecuting officers are entitled to part of the fine—are wrong and injurious to police work. Moieties, as they apply to the individual police officer, should be eliminated.

These opinions were voiced at Vancouver by Major-General J. H. MacBrien, commissioner of the Royal Canadian Mounted Police.

The individual R.C.M.P. officer did not share in proceeds from such cases but any share claimable was put in a general fund for the organization. When a moiety was granted there was always the suggestion of persecution, he said.

New Machines For Mines

Pit ponies doomed in their work, are now being replaced by electrical apparatus in the British Isles. The new machines have so many advantages over the game little animals which spend all their lives in darkness that many orders for it are being received from abroad.

Just A Deadlock

Enemy at the Manoeuvres—"You are my prisoner."

Sergeant Binks—"Nonsense! How did you get here?"

Enemy—"Over the bridge."

Sergeant Binks—"Then, my dear fellow, you are drowned. We blew up that bridge yesterday!"

Plumb Ocean Depths

Scientists Descend 2,510 Feet Below Surface Of The Sea

Establishing a new world's record dive, Dr. William Beebe and Otis Barton descended 2,510 feet below the ocean's surface seven miles off Bermuda. The previous record they made last year was 2,200 feet.

Darkness "blacker than the blackest night" and lights of deep-sea fish "like stars gone mad" were described by the divers after they emerged from the New York Zoological Society's bathysphere, a two-ton spherical diving apparatus invented by the two men.

After sailing out of St. George's on their tender, Dr. Beebe and his companion were sealed in the sphere and spent two hours and 51 minutes under water. Three hours and 19 minutes elapsed from the time they entered the metal ball until they crawled from its narrow entrance. For half an hour the scientists remained at the record depth.

The descent required an hour and 26 minutes.

Owing to the impossibility of pumping air into the sphere at such depths, the scientists had two tanks with sufficient oxygen for six hours. Only one was used and its supply lasted until the metal ball had risen to a point of 50 feet below the surface.

At the lowest depth a short motion picture film and a number of "still" shots were taken by means of a special powerful light. Dr. Beebe reported he saw more large species of fish than during any of his previous dives.

Constant telephone communication was maintained between the trader and bathysphere.

Storks Battle With Eagles

Win In Mid-Air Duel At Istanbul, Turkey

A battle to death between legions of eagles and storks in the air above Brusa, 60 miles southeast of Istanbul, Turkey, has been reported. The storks won.

According to the despatch, country folks saw eagles attack a nest of storks, killing the mother and seizing and flying off with the babies. Immediately a mass of 300 storks gathered in surrounding marshes and flew like a cloud on the eagles which had carried out a mass attack on the nest. More eagles gathered until there were some 60 of the great birds wheeling about awaiting the oncoming of the storks.

The two swarms of birds became one in midair. Twenty eagles were killed and 12 storks. The eagles then scattered.

Lake Dries Up

Lake In Southern Saskatchewan 20 Miles Long Has Disappeared

Willow Bunch Lake, one of southern Saskatchewan's largest lakes in normal years, is now absolutely dry.

Old residents of the district recall that the lake dried up in 1884 and again in 1896. For the past few years the water has been gradually receding, and this year none is left.

About 20 miles long and one and a half miles across a year or so ago, Willow Bunch Lake in the past has been measured with a depth of 28 feet.

We don't know what the world is coming to but wish it would come too, says the Brandon Sun.

The antlers of some Alaska moose have a spread of over 70 inches.

SELF-HELP DRESS FOR TINY GIRLS WILL BE APPRECIATED BY SMALL DAUGHTER AS WELL AS MOTHER

It won't catch on her nose or muss her hair up (so it needs more combing) getting it on and off.

She can dress and undress herself, for it buttons from neck to hem. Pressing such a model becomes a simple matter when it can be opened out flat.

Doesn't it all sound delightfully practical rig for a small girl of pre-kindergarten and kindergarten age?

Naturally the materials which come instantly to one's mind for such a dress is percale print, gingham checks and plaids, cotton broadcloths, crinkle crepe prints, etc.

Style No. 506 is designed for sizes 2, 4 and 6 years. See pattern envelope for material requirements.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Makes Flying Automatic

An invention enabling aeroplanes to operate automatically, including the take-off and landing, has been acquired by the French Army, after a year of tests. The invention, the work of four French engineers, was said to simplify piloting to an extent which would enable a child to run a 'plane.

So far as known, there is no running water, no atmosphere, and no vegetation on the moon.

Built In Record Time

Big Swimming Pool At Wembley Is Almost Finished

The Empire swimming pool at Wembley, England, now practically completed, is in many respects a world's architectural curiosity.

The building alone covers two acres of ground and is entirely of reinforced concrete. It has no steel girders and its 240-foot roof span—80 feet bigger than the main hall at Olympia—rises to a height of 90 feet without a pillar to uphold it.

It is erected on the cantilever principle—the first time such a feat has ever been attempted. Five and a half inches are allowed in the roof for expansion and contraction.

There are two acres of glass, and outside that two acres of ground for sun-bathing. It is the largest covered bath in existence, though its 200 feet by 60 feet looks almost insignificant, sunk in the floor of the vast hall. And one end it is ankle deep and at the other there is 16 feet 6 inches of water.

The pool holds 700,000 gallons of water and takes seven nights to fill.

An apparatus for raising waves send surf up the steps on to the broad sides where bathers may sit and be swept by breakers as on a beach.

The filtering plant is the biggest ever, too. It will filter, sterilize and return 700,000 gallons of water every four hours. Port lights under the water illuminate the pool.

There are restaurants, bars, shower-baths and a flooding chamber. The normal 5,000 seats can be quickly increased to 8,000, or to 12,500 for a boxing match. In the winter the pool may become a vast ice rink.

It has all been built in record time to house the Empire Games aquatic, boxing and wrestling events.

Ordinary Bicycle Pump Used

Supplied Air To Dog's Lungs During Unusual Operation

George, a five-year-old Seelyham, is frisking about the Angel Memorial hospital in Boston completely recovered from an unusual operation—the sewing up of a rent in his diaphragm.

A two-inch rip was perceived when the dog was under x-ray. The chance of the dog's living more than a few days under this condition was one in thousands, doctors said.

Dr. Rudolph H. Sheider performed the operation, first of its kind. An ordinary bicycle pump was used as a means of supplying air to the lungs. An attendant pumped continuously for two hours until the operation was completed.

Grasshoppers Destroyed

Vast Numbers Dead From Ravages Of Parasite Fly

Nature has laid the hand of death on millions of grasshoppers in the Sullivan Lake area in Alberta. Government experts report finding vast numbers dead from the ravages of a parasitic fly which lays its eggs in the body of the grasshoppers.

The dry bed of Sullivan Lake had proved a great breeding ground out of which they flew and did immense crop damage. It was covered with wild clover which provided their first food, then they turned to grain fields as the drouth progressed.

That marriage is bound to be happy to the end in which the wife is prepared to think that a bald head is very distinguished looking and the husband to consider 165 pounds or more exactly the right weight for a lady.

United Empire Loyalists Recently Celebrated The 150th Anniversary Of Canadian Exile

Kemalist Government Is Fighting Illiteracy

Great Progress Has Been Made In Turkish Education

Illiteracy is being combated by the Kemalist government. According to the last census, in 1927 only 10 per cent. of the Turkish population was able to read. It is estimated that, at present, about half of the population is literate.

Aside from normal school activity, progress is chiefly due to the work of adults' evening schools, which were organized when the Latin script was introduced four years ago. Education in the army, where the young recruit is acquainted in a course of three months with reading, writing and arithmetic, also has done much to diminish illiteracy.

Primary education is obligatory. Great stress is being laid in all schools on physical culture for boys and girls alike.

Education is free of charge and even in government boarding schools no fee for the maintenance is made.

Internal reforms of Hikmet Bey, energetic minister of education, leave no doubt that it is not the facade only which is being changed. He has ruthlessly dismissed more than thirty professors of Istanbul University as not corresponding to modern standards of science.

Most of them have been replaced temporarily by foreign scientists. Other experts have been invited from abroad to serve in high and secondary schools.

Famine In China

Five Million Persons Said To Be In Danger Of Their Lives

Five million persons are in danger of their lives from famine in various parts of China reports indicated lately, as almost unprecedented drought conditions in some sections and torrential rains and floods in others, struck terror in the peasant populations.

Price of grain and rice have reached heights unknown for three years. Brigandage is rife. Famished peasant mauraders, moving in large bands, are falling upon villages, ransacking them for every available scrap of food, then leaving the inhabitants to die of hunger. One such raid was made near Nanking.

From Hankow, it was reported that wolves and tigers, near starvation from the drought, attacked isolated peasant huts near Hupeh and devoured 10 persons.

In other sections of the interior, not drought but swollen rivers and floods are taking their toll in lives and property, and leaving many homeless.

Retires On Pension

Alberta Dairy Commissioner Began Career In Denmark 50 Years Ago

Just half a century after a summer day in Denmark when he entered the dairying industry, Dr. Christian P. Marker left his post as Alberta dairy commissioner at Edmonton, retiring on pension after 32 years as provincial director of dairying.

It was in 1884 that Marker, then 16 years old, began his career as a dairyman with a creamery in his home town of Vium, on the Jutland peninsula, just two years before co-operative dairying had been established for the first time in Denmark.

Six years later he came to Canada, and after a short time spent on a dairy farm near Toronto went to Ottawa as a member of the staff of the late Dr. J. W. Robertson, Canada's first federal dairy commissioner. In 1897 he was sent to Calgary.

HOUSEHOLD HINTS

Kerosene will quickly remove paint or varnish from the hands. Pour a little onto a cloth and rub over the hands.

Do not let hardwood floors get badly worn before having them polished. A little polish on the worn places each week keeps floors always looking well.

After washing woollen blankets rinse through several waters. Do not wring them out, but hang up dripping.

When making fruit pies dampen the edge of the pastry with milk instead of water. It holds better and the juice is not so liable to boil over.

Try adding a few drops of lemon juice to rice the next time you are cooking it. It makes it white and keeps the grains whole.

Rice puddings must be cooked very slowly to be good. It is only in this way that the starch grains have time to swell and thicken the milk thoroughly.

There is a fine of $250 for digging up the rare Tumboa plant of West Africa, a plant which grows only two huge leaves in its lifetime.

Husband: "You know, darling, that play made me think."

Wife: "Yes, it certainly was an extraordinary play."

Readers of London newspapers have had a "refresher" on American history, particularly as it relates to the United Empire Loyalists of Canada. The occasion arose with the publication of a news item that the "American Loyalists" had celebrated the 150th anniversary of the "exile of their ancestors in Canada."

The Morning Post on request has received an explanation from the United Empire Loyalists' Association of Canada reading in part:

"During, and more especially at the close of, the American Revolutionary War there was such a spirit of vindictiveness and intolerance exhibited toward those who had been either in deed or in spirit loyal to the British crown that many thousands were forced to leave their homes and possessions and seek shelter in Canada and elsewhere.

"At the treaty of peace, 1783, their banishment and extermination was a foregone conclusion, and the bitterest words ever attributed to George Washington were in reference to the loyalists, 'He could see nothing better for them than to recommend suicide.'

"The exact number of these exiled loyalists is unknown; certainly more than 55,000 went to Canada, and it is an error to suppose that Canada was the only country to which they migrated. The loyalists from all quarters of America embarked for England, Scotland, Newfoundland, Cape Breton Island, Bermuda, Bahamas, Florida and Jamaica.

"The loyalists were by no means all of English or British descent. They contained large numbers of New York Dutch, the descendants of the founders of New Amsterdam and Albany; German Palatines, whose ancestors settled in Pennsylvania. There were descendants of the original Swedish settlers of Rhode Island and of the French Huguenots of New Rochelle. There were large numbers of Quakers, the Highland Scotch settlers of Sir William Johnson and the Mohawk branch of the Six Nations.

"The descendants of these loyalists now reside in all parts of the Dominion, proud of their British tradition and proud of the 'Mark of Honor' bestowed upon them by His Excellency Lord Dorchester, the governor-general of the province of Quebec, and confirmed April 6, 1796, by proclamation of His Excellency John G. Simcoe, lieutenant-governor of Upper Canada.

"Those loyalists who have adhered to the unity of the empire and joined the royal standard before the treaty of separation in the year 1783, and all their children and their descendants, by either sex, are to be distinguished by the following capitals affixed to their names, U.E., alluding to their great principle, The Unity of the Empire'."

Gasoline Problem

Tests Show That Efficiency Varies Under Different Conditions

A three-year study of service station gasoline, revealing its "test" efficiency varies from week to week, even day to day, and from station to station, was made public recently at Walker laboratory of Rensselaer Polytechnic Institute in Troy, N.Y.

The variations were found in the same brands of gasoline, from causes all or mostly outside the manufacturer's control and due to storage, delivery, weather and the heredity of the gasoline. The study showed the changes may be sufficiently great to affect car performance, but probably not enough for the average motorist to notice.

They disclosed new "kinks" in the gasoline problem and indicated there has been a broad improvement in motor fuels, in that they increasingly approximate the car needs for which they are made.

It was explained that some of the gasoline escapes by evaporation, and the truant portion is that fast-vaporizing stuff which affects the "test" rating.

Elegance In The Hills

Two mountaineer women were discussing a man who had attended a party the previous evening.

"Now there's what I call a gentleman, remarked one of the ladies. Did you see him take his refreshments? When the hot drinks were passed he didn't do like the common folks around here. He didn't blow on it in his saucer a single time."

"I noticed he didn't," agreed the other. "He was a real gentleman, and just fanned it with his hat."

Could Handle It

A riot broke out in a small town called Kern City, and the local constable wired the sheriff to send aid in a short time the official arrived.

"What?" said the constable, "just you, only one man?"

"Well," answered the sheriff, "there's only one riot, isn't there?"

Salt beds covering an area of 40 square miles have been found in Nova Scotia.

Cows which freshen in November are higher producers than those freshening in June.

CANADIAN HORSES SHIPPED TO BARBADOS

Seventeen Canadian half-bred saddle horses are en route to Bridgetown, Barbados, British West Indies, consigned to the Inspector General of Police for Barbados. This is the second purchase of Canadian saddle horses by the Government of Barbados for its police force within a year. The horses in the picture are all bays, browns and chestnuts and stand from 15 hands 2½ inches to 16 hands high and were sired by thoroughbred stallions.

The intensive efforts of the Dominion Department of Agriculture in the past in creating breeding stations for horses, particularly of the saddle type, are now being duly appreciated by other nations, and it would appear that at last a great horse industry may arise from the foundations so well and truly laid by the Dominion Livestock Branch, by the experimental farms, and other associated divisions of the department. Recently there have been several shipments of horses abroad. Seventeen Canadian half-bred saddle horses have just arrived at Bridgetown, Barbadoes, British West Indies, for the Barbadoes police. This shipment constitutes the second purchase of Canadian saddle horses by the Barbadoes government for its police force within a year. Several months ago 15 horses were shipped and gave such eminent satisfaction that the additional order referred to was the result. The second shipment to Barbadoes was purchased from the breeding stations at Ailsa Craig and Brampton, Ontario. The horses are bays, browns, and chestnuts, standing from 15 hands 2½ inches to 16 hands high and sired by thoroughbred stallions.

Several inquiries have been received during the past few months from other countries for various types of horses raised in Canada. A few weeks ago 19 draft horses were sent to Scotland where they have given the utmost satisfaction, particular notice having been taken of their excellent all-round appearance. Nine of these horses, all grade Percherons, were from Western Canada, having an average weight of 1700 lbs. Ten of the horses, three of them Clydesdales, hailed from Western Ontario, the heaviest horse being 1,920 lbs. About the same time a trial shipment of 12 Clydesdales was shipped to Chester, England, and recent satisfactory reports have been received.

Made from the new silk fabric "Tensilex" originated by Supersilk

Fall and Winter Goods

Children's Wool Hose

Fine cashmere rib. Clinton make. Colors: Sand, Tan and Black. Sizes 4½ to 10.

FIVE KILLED IN AIR CRASH

Bagdad, Irak, Sept 11—Three Royal Air force officers and two soldiers were killed Tuesday when their army aeroplane crashed at Hinaida airport.

—x—

Perry Rutledge, of Storm Lake, Iowa, was a visitor in the district last week looking after his interests here. He says he never saw a crop on his way from Iowa to Canada, until he reached MacLeod. The crops in Lacombe district he says are the best he has seen in the province, and he thinks our farmers have a lot to be thankful for this year.

—x—

Remember our Call For and Delivery service is absolutely free too. Why not give us a ring. The number is 92.

—x—

Dave Hay has just opened out his fall and winter stock of the celebrated Stanfield's Underwear, in all weights and grades. You can buy your underwear at my store much cheaper than elsewhere. Come in and see.

—x—

We are glad to see Mr. W. D. Murphy around again and back in the grain business assisting at the Chop Mill Elevator, buying Wheat, Oats and Barley in wagon loads or car lots over platform.

—x—

Mrs. E. Geschwendtner, of Chase, B.C., arrived in Lacombe this week, and will visit her sons and daughters at Clive, Tees and Mirror, for several weeks.

—x—

Get your threshing meat at A. Gilmour's No. 1 steer and heifer meat.

—x—

Why not Phone 92 today and let us pick up that winter coat so as to have it all ready for the first cold morning that comes along.

—x—

Stanfield's Underwear at lower prices at Dave Hay's Men's Store.

WANTED

Caretaker for "St. Cyprian's" Church of England for period of 6 months, viz: Oct. 1st to March 31st, 1935. Tenders to be in hands of Vestry Clerk not later than Sept. 26, 1934. Lowest or any tender not necessarily accepted.

Signed: J. Sowerby.
(Acting) Vestry Clerk

POSITION WANTED

Housekeeper desires position—two children 5 and 4 years; wages board for children and $5.00 per month. Mrs. Anne Costyk, Hunna, Alta.

SHEEP ON SHARES

Would like to put out on shares young Ewes (Suffolk Breeding) for a term of three years; also have a large number for sale on reasonable terms or will trade for cattle or horses. A. S. MacKenzie, Box 272, Lacombe, Alberta.

FORM "F" SECTION 189
TOWN & VILLAGE ACT, 1934

—x—

Notice to Relatives of Persons on the Assessment Roll and To Tenants.

NOTICE IS HEREBY GIVEN that during the months of September and October, 1934, applications may be made under the provisions of Section 139 of the Town and Village Act, for the inclusion in the Voters' list of the Town of Lacombe by the following persons, namely:

1. The wife, husband, father and mother and every son and daughter of any person whose name appears upon the assessment roll who are entitled to be placed upon the said list—
 (a) if he or she is a resident with the said person within the town or assists him in a business in respect of which he is taxable; and
 (b) if he or she is of the full age of twenty-one years; and
 (h) if his or her name does not already appear on the roll.
2. Tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August this year.

Dated this 28th day of August, 1934.

Morning, Noon or Night

START the day with a bowl of crisp Kellogg's Corn Flakes. Delicious with cream or milk, and fruit. Rich in energy — quickly digested — the kind of breakfast that makes you feel fit.

Enjoy Kellogg's for lunch. So nourishing and easy to prepare! So economical! Fine for the children's supper, too, or a late evening snack. They encourage restful sleep. Made by Kellogg in London, Ontario.
